ACKNOWLEDGMENT

This Third Party Validation of Basic Education Community Schools in Khyber Pakhtunkhwa and FATA was a challenging task, owing to the turbulent situation in the area. In some areas even movement without permission of the authorities was not possible and some areas are out of bound, where there is military operation in FATA particularly Khyber, North and South Waziristan Agencies.

We are indebted to the team of DAC Field Staff, who have made this report possible and worked in conditions of risk and uncertainty. Pak-Women, our partner played key role in mobilizing the field staff through their GEN network.

We are grateful to Mr. Ghulam Qadir Khan, Director General BECS for his kind guidance and support, especially helping us out in the Tribal Areas, particularly in North and South Waziristan Agencies. He closely monitored the project and made it possible to be implemented in such a short period of time. I would also like to appreciate the active support of Deputy Director Administration/Operation, Mr. Adnan Asif Khan and Mr. Shehbaz Ahmed, Director Administration with his helping approach, I also acknowledge the committed association and supportive approach of Mr. Karim Shah Regional Director BECS-KP & FATA, the always concerned Ms. Nadia Khan, Assistant Director KP and FATA Desk and Mr. Kashif Sohail Deputy Director Monitoring BECS Islamabad. Without their support it would not be possible for us to achieve the targets and validation activity.

I would also like to thank all the BECS Teachers and Community Members who have made this validation process possible, the DAC management especially, Mr. Raza M. Khan Director Administration & Ms. Farah Khan Manager who worked very hard with professional commitment and last but not the least Ms. Azra Gul, Executive Director Pak –Women who blessed the project with her rich experience and valuable guidance. DAC also thank all other stakeholders who have assisted in any shape by making this validation process possible.

Fida Muhammad Khan
Executive Director (DAC)

EXECUTIVE SUMMARY

This Third Party Validation (TPV) is the physical verification of the status of Basic Education Community Schools (BECS), by validating the status of schools, their functional status, information about teachers, enrollment, students' assessment, prospects of continuation of their education, role of community, ownership of the community, role of the Village Education Committees (VECs), preferred skill development training after graduation from the schools, other government schools in the vicinity, availability of books and classroom consumables etc. The report in hand is an exercise carried out in Khyber Pakhtunkhwa (KP) and Federally Administrated Tribal Areas (FATA) for the Basic Education Community Schools (BECS) Programme, under the Ministry of Education & Professional Training Federal Government Islamabad. The programme focuses on non-formal education and works with the overall objective to “Strengthen non-formal approach to supplement the formal education, for eradication of illiteracy and achievement of Universal Primary Education (UPE) as envisaged by Constitution of Pakistan's Article 25-A, and in MDGs, by extending free, flexible and modern basic education opportunities to “out of school children and youth”, having no access to the formal system of education, especially disadvantaged children, girls and special children, for an equitable society.”

The Programme started in 2006 with the aim to establish 20,000 schools in the country. Presently there are about 13,094 BECS working in the country in the following administrative territories:

- a) Punjab
- b) Sindh
- c) Khyber Pakhtunkhwa
- d) Balochistan
- e) ICT, AJK, GB and FATA

The remarkable achievements of the Basic Education Community Schools (BECS) Project in increasing literacy by educating Rural Adults and Out of School Youth, especially women and girls, are that “Basic Education Community Schools” BECS Program made 5.2 million disadvantaged children literate in last ten years, which is almost 10% of Global out of school children. BECS has produced 0.5 million primary graduates in the same period with a pass percentage in class V of 86%. Gender Empowerment is an important consideration in BECS, as 80% of teachers / staff and 60% of students are female in the project. A very important achievement of BECS is that it has educated children at one-sixth cost of the formal schools with outstanding Cost-Benefit Ratio.

The strategy of BECS has become an important agent for social change by not only providing free education to millions of disadvantaged children, especially girls, combating against child labor, but the increased involvement of local community, local leaders and stakeholders is also accelerating the process of socio-economic development in less developed areas.

A large number of Civil Society Organizations are also partnering BECS in managing these schools in KP & FATA. Training and refresher courses are regularly imparted to all BECS Teachers. Despite adverse security situation, terrorism and social taboos, BECS strived hard to educate the disadvantaged segments of society, especially girls, and contributed significantly to “Gender Empowerment” in some of the most difficult regions of the world like FATA.

Therefore, “Basic Education Community Schools” has contributed laudable achievements in the last ten years, in empowering and educating Out of School children, especially girls. About five million disadvantaged children were able to improve their quality of life as a result of literacy provided to them by BECS, and it made huge contribution in significantly reducing the number of global out of school children, and that too at a low cost. BECS has become an important agent for social change and has contributed meaningfully to socio-economic development of Pakistan, empowering the poor and vulnerable.

The Third Party Validation (TPV) has been done to evaluate the performance of the BECS and verify the schools network. The Key Objective of the TPV was to verify on ground existence and functionality of all the schools, students and need for non-formal education for out of school children, verification of students as per Quarterly Progress Report (QPRs), quality of Education and Training requirements of students (esp. Vocational Training), quality of Education and Training requirements of BECS teachers and staff, existence and status of Village Education Committees (VECs), Areas of Assistance from Development Partners, and resource requirements and any other requirement intimated in writing by BECS, Head Office.

The Analysis is based on the Schools survey and comprehensive data capture Questionnaires, covering all aspects of the BECS. Besides that physical record of the schools has been verified through pictures of the schools, students, registers, academic certificates, interviews/feedback from the community and members of the Village Education Committees (VECs). The Questionnaire is broadly divided into 10 Sections.

Information about the availability of nearest School is quite revealing. Average distance is about 3 kilometers. Some are in the range of 1 kilometer and some at a distance of 20 kilometers. Out of 1389 BEC schools in KP and 970 BEC Schools in FATA, majority of the schools available in the closer vicinity are government schools, followed by private school. Out of the total schools in in the closer vicinity in KP, 75% are government schools and 25% are private schools, 76% of the nearest school to BECS are primary and 24% are middle, 64% of the schools close to BECS are for boys and 35% for girls. The long distances between the available schools and community, necessitates establishment of BECS to plug the gap.

This situation is quite trendy, as the government schools are highest in number, and have the largest coverage and the largest facility. However private schools are spreading with fast speed and have a significant number of schools like 25% of all schools. Primary schools are 76%, indicative of the fact that primary schools have a wider coverage as compared to middle and high schools. The gender imbalance is visible in the availability of schools, which shows that the girls’ schools are only 35% among the available schools and need huge investment to remove the gender disparity.

An overwhelming 65% of the school buildings are comprised of Teachers' home followed by community provided (17%) and rented (15%). Almost 85% of the buildings are provided by the community (teachers or community) and hence main factor in the success of the program depends on the personal involvement of the teachers and community.

There is harmony in the general trend in the performance indicators of KP and FATA, due to similarity in socio-economic conditions, culture and close interaction of KP and FATA. However male-female enrollment and survival rates are a bit different, owing to the fact that majority of the teachers in KP are female and hence higher percentage of girls' students in KP. On the contrary higher percentage of teachers in FATA are male and hence higher percentage of boys in FATA. However the trend shows that enrollment of girls is increasing in FATA and this year (2015) it has increased from 27% to 31% of the total enrollment.

The data about availability of teaching material reveals that about 51% of the schools have signboards, 81% have blackboards available, books are available in 85% of the schools, mats available in 67% schools, study charts in 58%, and Teachers Diary in 26% of the schools. However the attendance and admission registers are in adequate number, in almost 94% of the schools. This may be due to wear-tear of the consumables like mats, charts & books and there may be a mechanism for replenishment of these supplies on an ongoing basis.

Majority of the Teachers (44%) have Intermediate (FA/F/Sc) qualification, followed by Matriculates who are 37%, graduates 16% and post graduates are 3% whereas a small percentage is having other qualification. Though matric /SSC is the basic qualification for the BECS teachers but majority of them (63%) are having inter or higher qualification, which positively affects the teaching quality.

Significant number of BECS teachers are trained. 39% of them are PTC trained, 10% are CT, 9% or B.Ed, 1% are M.Ed and 5% are others. Whereas 36% are untrained. About 74% of the teachers have got training under BECS project, out of which 48% teachers have got 7 days training and 45% teachers have got 15 days training.

The situation warrants training of the 36% teachers through a "Fast Track" crash programme or through the BECS specially designed training program. The professional training will build their capacity in terms of pedagogy and other essentials like classroom management, student's behavior, community mobilization, students' record management etc.

About 1/3rd of the teachers are found with very good performance, 55% are having satisfactory performance and performance of only 4% teachers is found unsatisfactory. Majority of the teachers (at the average 64%) are found having satisfactory teaching experience, can administer classrooms, know teaching methods and know the sitting arrangement of students.

The training Need Assessment indicates that 34% of the teachers need dedicated/specialized training in multi-grade teaching as one teacher is teaching five classes alone, with all subjects to be covered, 38% of the teachers require training in school administration, 26% in preparation of test papers, 40% in increase in enrolment or community mobilization and retention of students and

11% in other fields. Subject specific training need assessment indicates that 19% of the teachers need training in teaching science & maths, 33% in English and 5% in other subjects.

Enrollment is the main focus area of BECS Project and TPV. The survey data provides district, tehsil and UC wise information about school wise enrollment. Total enrollment in 1385 functional BECS in KP is 48,965 out of which 15,117 are boys and 33,848 are girls. Out of the total enrollment in BECS in KP, 31% are Boys and 69% are girls. 39,014 students were found present on the day of validation, out of which 11,851 were boys and 27,163 were girls. The present percentage in boys was 78% and in girls was 80%. This trend indicates that a high proportion of girls are getting benefit from BECS. The number of girls across the classes is higher than boys, transpiring the fact that higher number of girls are out of school and facing the issue of access to schools and BECS has plugged that gap and secondly the teachers are predominantly females, with whom the girls and their families feel comfortable to continue education. However the gender parity index has dropped in 5th class which could be attributed to girls' age, cultural issues and their opportunity cost at home. This trend is in harmony with the girls' enrollment and retention in mainstream conventional government schools.

The ratio of dropout is high in boys in all class levels except class three. Average dropout in girls is 16% whereas average dropout in boys is 22%. This ratio of dropout or retention is in congruence with the dropout rate in KP's government primary schools. The lower dropout in girls advocates the passion and commitment in girls for getting education. However the situation requires policy reforms under Article 25A of the Constitution about free and compulsory school level education. All the provinces have promulgated the Right to Education Acts except KP. The Acts will not only ensure admission of out of school children but will also ensure their retention in schools.

The attendance situation on the day of TPV survey is satisfactory being above 79% at the average. The class wise attendance of girls is higher than boys across the classes from Kachi to fifth grade. This is indicative of the fact that BECS are close to community and close to girls and girls are more regular, punctual and serious in studies as compared to boys. This argument finds further strength from the increase in girl's attendance with the rise in class level from Kachi to fifth, which shows the commitment and degree of importance the girls' attach to the education as they get maturity. This is quite revealing fact of the TPV.

Major reasons of leaving school are poverty 20%, no books 23%, migration 17%, and lack of parents' interest 11%, admission in other govt. schools 7%. The other factors are beyond the control of BECS but timely provision of textbooks is essential for retention and control over the dropout due to books.

The students' assessment is judged on four scales i.e. to be very good, good, satisfactory and unsatisfactory. The results are improving with the progression of classes/levels. The ratio of very good and good results is improving, reducing the satisfactory slab and this ratio attains the maximum in fifth class, where students get maturity and start understanding things. A small percentage is performing below satisfactory level, which is normal at school level.

The pass percentage in both boys and girls is quite high. Fail are 12%, which is less than normal. The result of students appeared in 5th grade exam is same in percentage terms for both boys and

girls. The absolute number of failed students is higher in boys but both have a pass percentage of 88%. This is more encouraging in case of girls, who secured equal position in pass percentage with boys.

The trend of result in Girls is better than boys. The girls have outperformed boys in majority of the years under review between 2007-2015. The average pass percentage in girls is 89%, two percentage points above the boys. This is indicative of the dedication and interest of girls in education and learning.

The outcome of BECS in literacy and continuation of education is visible in continuation of the education by the students taking admission in 6th class. A significant number of students get admission in 6th grade. Above 80% boys and 70% girls passed in 5th grade get admission in class 6th in KP. This ratio is 40% for boys and 35% for girls in FATA.

The trend of admissions in 6th grade in girls is lower than the boys, which is indicative of socio-economic factors hindering girl's education at higher level particularly in rural areas. Secondly non-availability of schools within reach for 6th grade girls to travel safely is another big issue. The poverty, parental preference and priorities and opportunity cost of girls hinders the admission in 6th grade. BECS has plugged the access issue at primary level but there is no such arrangement at middle and high school level and hence it becomes difficult for the female students to continue, owing to long distances to be travelled, which involves both security and cost of travelling and hence continuation of education beyond 5th grade becomes difficult.

The students were asked to indicate their preferred training which they would like to seek after the primary level graduation. The findings are quite heart touching and revealing. An overwhelming majority 33%, desired to seek higher education, which shows the urge and interest of the children by recognizing the importance of education. But they are unfortunate by not having the educational institutions within reach and their lack of financial resources to afford off-village education. BECS is doing a GREAT job by providing education opportunities to such unfortunate children at their doorsteps.

The second preferred option is the training in IT (21%), which shows the awareness in children about the advantages, importance and future of IT. The third preferred training that the children would like to acquire is handicrafts (16%) followed by embroidery (13%) and beautician 5%. All these three are the preferred subjects of girls.

Almost all the teachers reported that the attitude and behavior of the NGO's monitoring Supervisors as well as BECS Monitoring Officers is friendly and the negative replies in this regards are insignificant. 71% of the VECs were found functional, whereas the others are required to be activated and made functional and the community may be involved in the affairs of the BECS. About 97% of the parents whose opinion was sought during the survey were found satisfied from the teaching. Corporal punishment, do children work for the teachers or do they pay fine were found insignificant. All the schools are functional except few. However 130 BECS are inaccessible being in operation area in North and South Waziristan Agencies. Performance of 53% of the functional schools is satisfactory, 38% is very good and only 4% is weak. The closed non-functional schools are due to teachers' absenteeism and inaccessibility in FATA.

In FATA total enrollment in 837 BECS (130 schools are inaccessible in North and South Waziristan and 3 are non-functional) is 42,646 out of which 29,307 are boys and 13,339 are girls. Out of the total enrollment in BECS in FATA, 69% are Boys and 31% are girls. The enrollment has improved and the total enrollment may add about 6000-7000 students if the inaccessible schools are taken into account. 37,335 students were found present on the day of validation out of which 24,829 were boys and 12,506 were girls. The present percentage in boys was 85% and in girls was 94%.

Dropout rate is in normal range commensurate with other govt. schools in FATA. The ratio of dropout in girls is low between Kachi and class two but has increased in higher classes. Average dropout is 18% whereas average dropout in boys is 17% and in girls is 18%. This ratio of dropout or retention is in congruence with the dropout rate in FATA's government primary schools.

The attendance situation on the day of TPV survey in FATA was found satisfactory being above 90% at the average. The class wise attendance of girls is more than boys across the classes from Kachi to fifth grade. This is indicative of the fact that BECS are close to community and close to girls and girls are more regular, punctual and serious in studies as compared to boys. This argument finds further strength from the increase in girl's attendance with the rise in class level from Kachi to fifth, which shows the commitment and degree of importance the girls attach to education as they get maturity.

The outcome of BECS is literacy and continuation of education, which is visible in continuation of the education by the students taking admission in 6th class, as above 45 percentage of boys passed in 5th class get admission in 6th grade. The situation of continuation of education in Girls is worth attention. In FATA the trend of admissions in 6th grade in girls is lower than the boys, which is indicative of the socio-economic factors hindering girl's education at higher level particularly in rural areas. Secondly non-availability of schools within reach for a 6th grade girl to travel safely is another big issue. The poverty, parental preference and priorities and opportunity cost of girls hinders the admission in 6th grade. BECS has plugged the access issue at primary level but there is no such arrangement at middle and high school level and hence it becomes difficult for the female students to continue, owing to long distances to be travelled which involves both security and cost of travelling and hence results in discontinuation of education beyond 5th grade.

In KP 5 schools are non-functional, one each in Chitral, Abbottabad, Kohat, Charsadda and D.I.Khan. In FATA 3 schools are closed in Bajour Agency.

1. Socio-Economic Context of Pakistan

1. Pakistan is lower middle income country, with a population of 179.2 million inhabitants, estimated in 2012, the world sixth most populated country, having a land area of 796, 095 square km. Pakistan ranks 146th out of 187 countries in the 2014 human development index. The country continued facing great challenges, in the fields of security, rule of law and economy combined with increasing demographic pressure. Currently this is the third consecutive term of political or hybrid rule and moving to towards stability while combating the challenges of extremism and terrorism.
2. According to the World Bank Worldwide governance indicator, 2012 (0=worst and 100=best), Pakistan scored 24 in voice and accountability, 0 in political stability and absence of violence, 23 in governance effectiveness, 25 in regulatory quality, 19 in rule of law and 14 in control of corruption.
3. For the year 2014, GDP of Pakistan is US\$ 236¹ billion whereas the GDP according to purchasing power parity index is US\$ 574 billion. Labour force is 59 million and unemployment is 6.6% and inflation is 7.7%. Country's export are US\$ 25 billion and imports are US\$ 40 billion. External debt is US\$ 52 billion and public debt is US\$ 54 billion, taxes are 12.6% of GDP and bank discount rate is 12.5%, distribution of income is drastically uneven as the lowest 10% of population consume only 3.9% and the highest 10% of the population consume 40% of the resources.
4. Pakistan is one of the countries among 20 countries of the world where remittances cover more than 20 percent of imports and also remittances are equivalents to more than 30 percent of exports. Remittances continue to provide essential support to the balance of payments. The share of KP in the remittances is about 1/3rd and has direct bearing on the province's economy.

1.1 Development Profile of KP

5. The province of KP comprises 17 settled districts and the Provincially Administered Tribal Areas (PATA) of KP consists of Malakand Agency and the districts of Upper Dir, Lower Dir, Chitral, Swat, Buner, Shangla and the pocket of Kala Dhaka and Kohistan. According to the 1998 census, the total population of KP was approximately 17.7 million and has grown at an annual growth rate of 2.82 percent with a sex ratio of 105.
6. GDP of KP is about 9% of the country's GDP or US\$ 21.24 billion in 2014. The other socio-economic indicators in KP such as literacy, health indicators, employment, per capita income, poverty, distribution of income, migration are poorer than the county's average. Population growth rate in KP is about 2.8% against the country average of 2.1%, the population grew to 26.89 million in 2014 against 17.74 million in 1998 census.
7. 34% of total households in the province report daily wages as the main source of household income, followed by formal employment (33%), business (14%) and crops/livestock (8%). The

¹ Economic Survey of Pakistan 2013-14, Khyber Pakhtunkhwa Development Statistics 2014

remaining sources - pension, remittances and others - range from 2% to 5% respectively. Approximately one in four households receive remittances from abroad and around one quarter of total households receive remittances. More than two-fifths (42%) of the population aged 15 and older are part of the active labour force, which consists of employed (39%) and unemployed (3% of the adult population) persons.

8. The province of Khyber Pakhtunkhwa is blessed not only with hard working and enterprising people, but also with rich and diverse natural resources. The province, however, has remained one of the poorest province in Pakistan. With a bulging population of about 26 million, the province has the most youthful population in Pakistan, with about 30% of the male population between the age of 15 and 30. The large majority of this young male population has fewer employment opportunities.

9. The province hosted more than three million refugees for over three decades which, besides creating a plethora of socio-economic and environmental challenges, also negatively influenced the security situation. Ensuring security today, therefore, is a huge burden on the public exchequer.

10. Due to the direct result of higher input costs, electricity shortages and prevailing insecurity in the region, the private sector in the province could not thrive as it did in other parts of the country. Consequently, there are fewer employment opportunities within the province. Many of the young workforce often migrate to other parts of the country or the Middle East in search of employment but since this workforce is poorly skilled, they are unable to secure better paying jobs.

11. The province has strong agricultural skills, and offers a diverse climate and landscape for a variety of tourism activities. Located at the crossroads of important international trading routes, the people of Khyber Pakhtunkhwa have long traditions of trade and travel. Hydroelectric power, forestry and minerals offer resources for a modern economy.

2. An overview of the status of Education in KP

1. Education is a provincial subject after promulgation of the 18th Constitutional amendment. The provinces are dedicating major share of the resource pie to Education but due to exploding population, the expansion could not cope with growing number of school going population. The problem surmounts all endeavors, with a marginal percentage growth with respect to school population, nonetheless the absolute enrollment numbers are increasing. Education is a very important human development indicator of a country's development and socio-economic progress. The Education sector in Pakistan has suffered due to multiple factors, major among them are low budgetary allocations, inconsistent policies, lack of accountability, political interference, wide spread poverty, lack of administrative and financial capacity and weak M&E system.

2. There are three departments of education in KP--namely, Elementary & Secondary Education (E&SE) (typically called education department), Higher Education, and Technical Education. The E&SE Department is responsible for the administration of all public schools, from grades 1 to 12. Schools are categorized into primary (grades 1-5), middle (grades 6-8), high (grades 9-10) and higher secondary (grades 10-12). A Minister heads the E&SE Department and his executive authority is vested in the Secretary of the Department.

3. E&SE Department is the largest of the three departments with a staff strength of 187,000 employees, which represents 47% of the employees in all the departments of the KP province (KP Government of 2014-15). In administrative terms, the E&SE Department is comprised of the Directorate of E&SE, the Directorate of Curriculum and Teachers Education (DCTE) and the Provincial Institute for Teachers' Education (PITE). Major functions of E&SE Department are: formulation of policies, preparation of the Annual Development Program, literacy improvement, improvement of quality in primary and secondary schools, and posting/transferring officers from pay scale 17 and above in schools.

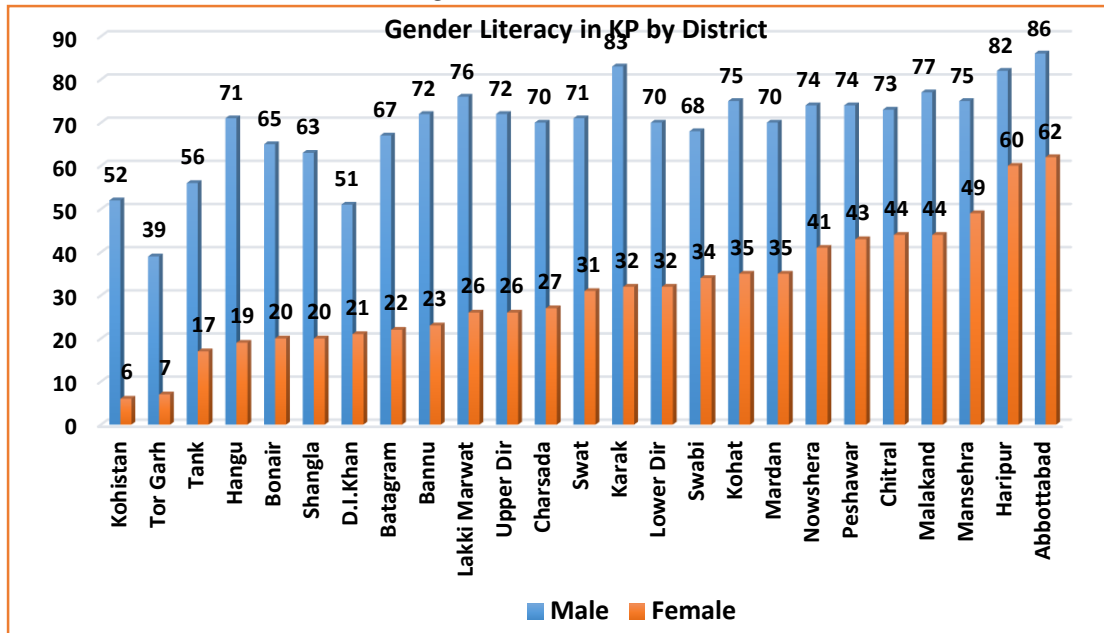

4. The Province of Khyber Pakhtunkhwa has more than 0.5 million out-of-school children. Those who are already in schools are not learning enough to an acceptable standard. Constant exposure to conflict and disasters have further exacerbated this challenge by increasing the need for reconstruction and rehabilitation of schools. Though the provincial government is undertaking ambitious steps to improve service delivery. But the pace of progress on these reforms however has been a constant challenge.

2.1 Literacy rate in KP

5. Khyber Pakhtunkhwa shows slow progress and lags behind all other provinces except Balochistan on the education related Millennium Development Goals. The 2012-13 Pakistan Social and Living Standards Measurement survey reports that the literacy rate of Khyber Pakhtunkhwa (KP) for the population of 10 years and above is just 52 percent below the country average of 60 percent. Province wise comparison reveals that Punjab leads with 62 percent

followed by Sindh with 60 percent, KP with 52 percent and Balochistan with 44 percent. District wise literacy standing by gender is depicted in Figure 1 below.

Figure 1: PSLM 2012-13

6. Abbottabad stands on top with 73% literacy and Tor Ghar at 21%. Similarly there are large urban-rural and gender gaps in the literacy rates, across all districts in KP. Moreover, According to the Annual Statistical Report of Government schools (2012-13), 50 % of government primary schools for boys are run with two or less teachers while the same ratio is 60% for girl’s primary schools. Similarly, 52 percent of the boy’s primary school has only 2 or less rooms while 57% of girl’s primary schools are with 2 or less rooms. In 2012-13, around 26% of the total girls enrolled in the government primary schools are attending boy’s schools. Similarly around 4% of the total boys enrolled in government primary schools were attending girl’s schools. Wide disparities exist both at the educational level of the schools and at the gender level.

2.2 Public and Private Sector Education infrastructure

7. There are 28,319 Government Schools in Khyber Pakhtunkhwa, of which 27,892 are Functional, 387(367 Primary + 20 Secondary) are non-functional / temporarily closed and 40 are newly constructed. Out of the functional 27,892 schools, there are 22,892 (14,670 Male (65%) + 8222 Female (35%)) Primary and 5000 (3132 Male (63%) + 1868 Female (37%) Secondary Schools. 40 schools (31 Primary, 9 Middle Schools) are newly constructed but not yet functional. Out of the 22,892 functional primary level schools, 20,304 are Government Primary Schools, 2305 are Mosque/Maktab Schools, 253 are Community

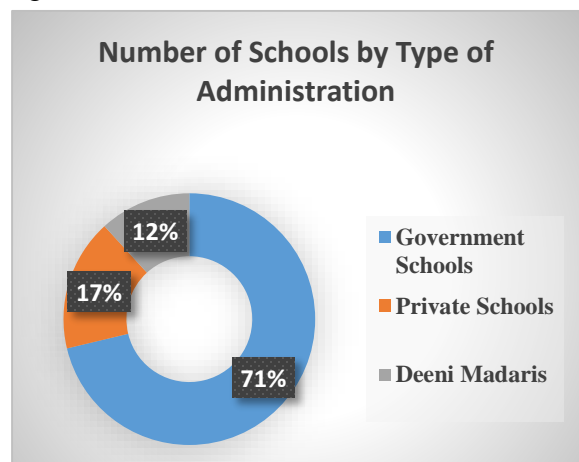

Figure 2: ASC Private Schools 2011-12 & Govt. Schools 2013-14

Primary Schools, and 30 are JICA Primary Model Schools. Functional Primary Schools by location are 1230 in urban and 21,662 in rural areas.

8. There are 6743 Non-Govt. Schools in Khyber Pakhtunkhwa, out of which 449 are Boys Schools, 283 are Girls and 6011 are Co-Education Schools. By level there are 1981 Primary, 2316 Middle. 1805 High and 641 Higher Secondary Schools / Inter Colleges and most of them have primary and middle sections as well. Overall enrollment in Government Schools is 4.16 million with 3.01 million (69%) in Primary, 1.15 million (27%) enrolled in Middle and Secondary

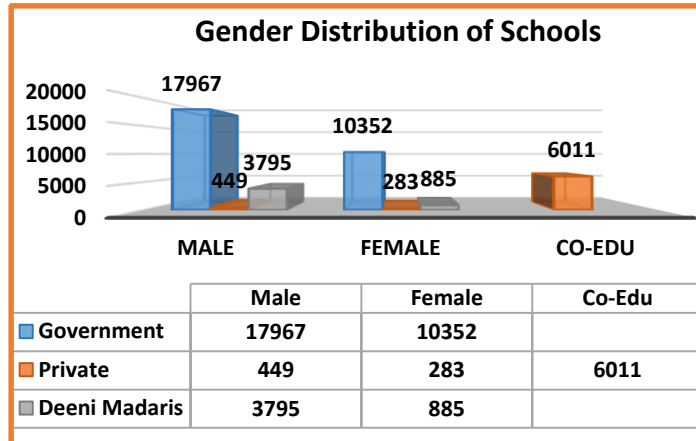

Figure 3: ASC Private Schools 2011-12 & Govt. Schools 2013-14

Schools. Further breakup of enrollment in Middle and Secondary Schools by level is Middle 21%, High 58% while Higher Secondary is 22% (high and higher secondary schools have middle sections as well).

9. Public sector is the largest education provider. But the ratio of private schools is steadily growing. Presently out of the total enrollment of 5.987 million children, 69% are in government schools, 27% in private schools and 4% in Deeni Madaris/seminaries. The ratio of enrollment by gender is also at the same pattern in the three types of educational institutions. 65% Male and 77% female enrolment is in Government schools, 30% male and 21% female enrolment is in private schools and 5% male and 2% female enrolments in Deeni Madaris. This phenomenon shows that public sector is the main education provided. But the private sector is serving almost one third of the children. Private schools

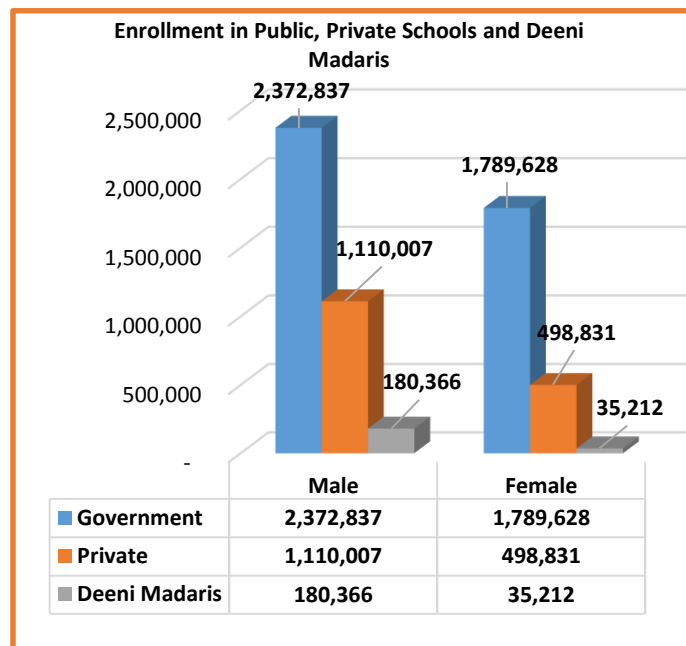

Figure 4 : ASC Private Schools 2011-12 & Govt. Schools 2013-14

are 27%. Government schools are 71% but their enrollment share is 69%. The private schools have outclassed the government schools in performance and efficiency and unit cost despite the fact that average salaries in government schools are higher than private schools. The teaching hours of

private schools are also very intense. The deeni madaris lags behind in terms of enrollment. Their number of institutions is 12% of the total institutions but their enrollment is only 4%.

10. The Teacher: Student Ratio in Government Primary Schools is 1:42 and in Secondary Schools level is 1:25. The Gender Parity Index (GPI)³ is 0.75 at Primary level while at Secondary level it is 0.57 in the year 2013-14. Annual Growth Rate over the last 10 years in number of functional Schools is 0.89%, in working teachers is 1.23% while in enrollment is 2.96%. At the provincial level, out of the total functional schools, 24% schools are without boundary wall, 34% are without water supply, 46% are without electricity and 22% are without toilet facility.

11. Khyber Pakhtunkhwa is one of the poorest provinces in Pakistan. Decades of low involvement in national development, worsening law and order situation since 2001, natural disasters and governance issues are hampering the progress of the province. These factors affect socio-economic development indicators of the province which are one of the lowest in the country especially the data concerning basic educational outcomes such as: literacy rates, enrollment, survival rate to grade 5, dropout rates, transition rate from primary to lower secondary and number of out of school children.

2.3 Literacy Rates

12. The literacy rate (for persons aged 10 years and above)² in Pakistan for 2010-11 is 58 percent and is significantly higher for men (69%) than for women (46%)³. These percentages indicate that approximately 45 million people lack basic literacy skills in Pakistan, two-thirds of which are women. Pakistan has been ranked the third largest country in the world in terms of illiteracy⁴. Comparisons across provinces suggest that the literacy rate is highest in Punjab Province (60%), followed by Sindh with 59 percent literacy rate, Khyber Pakhtunkhwa with 50 percent and Baluchistan with 41 percent⁵. In addition, literacy rates are much higher in urban areas than in rural areas and higher among men than among women. In KP, the female literacy rate is only 33 percent and in Baluchistan the female literacy rate is an extremely low at 19 percent.

² As per 1998 Census, literacy has been defined as: the ability of a person who can read a newspaper and write a simple letter in any language.

³ Pakistan Social and Living Standards Measurement Survey, 2010-11

⁴ EFA Global Monitoring Report 2012.

⁵ Pakistan Social and Living Standards Measurement Survey, 2010-11

Table 1: Literacy Rate (10 Years and Above) - Pakistan and Provinces

Literacy Rate (%)			
Province	Male	Female	Total (%)
Pakistan	69	46	58
Punjab	70	51	61
Sindh	71	46	59
KP	68	33	51
Baluchistan	60	19	40

Source: Pakistan Social and Living Standards Measurement Survey, 2010-11

2.4 Primary Enrolment Rates

13. Gross and Net Enrolment Rates (GERs and NERs) are widely used to assess levels of educational access. GER is an indicator of children's entry and progression through primary school cycle regardless of official age group whereas NER measures the extent of participation of children belonging to the official age-group. The discrepancy between the GER and the NER indicates that enrolled children enter late to the first grade or do not progress regularly through the grades. For example, in Pakistan GER at the primary level was 92 percent in 2010-11 whereas NER was 56 percent. Thus, GER and NER help policymakers to monitor the success of policies designed to address these issues.

14. As presented in Table 2, the GER⁶ at the primary level was 92 percent in Pakistan in 2010-11. Amongst the provinces, Punjab has a highest GER rate of 98 percent (103% for male and 93% for females) followed by Khyber Pakhtunkhwa with GER as 89 percent, Sindh 84 percent and Baluchistan 74 percent in 2010-11⁷. Female primary enrollment rate is lower than that for males especially in Baluchistan (52%), Sindh (72%) and KP (76%).

Table 2: National and Provincial GER (Percent) at Primary Level

GER 2010-11 (%)			
Province	Male	Female	Total
Pakistan	100	83	92
Punjab	103	93	98
Sindh	94	72	84
Khyber Pakhtunkhwa	101	76	89
Baluchistan	92	52	74

⁶ GER = (the number of children attending primary schools (grade 1-5) / the number of children aged 5-9 years)*100. Enrollment in Kachi classes (pre-primary) has been excluded. The GER encompasses all schools (public, private and other public schools).

⁷ Pakistan Social and Living Standards Measurement Survey, 2010-11.

Source: Pakistan Social and Living Standards Measurement Survey 2010-11; Pakistan Economic Survey 2011-12.

15. The NER or net primary level enrolment rates⁸ at the national level for the age group 5-9 years was 56 percent in 2010-11. Since 2001, the percentage of female NER at the national level is on the rise (from 38% in 2001 to 53% in 2010-11). However, there is not much change in the male NER since 2006 (60%).

Table 3:: National NER (Percent) at Primary Level-2001-10

Year	Male NER (%)	Female NER (%)	Total NER (%)
2001-02	46	38	42
2004-05	56	48	52
2005-06	56	48	53
2006-07	60	51	56
2007-08	59	52	55
2008-09	61	54	57
2010-11	60	53	56

Source(s): Pakistan Social and Living Standards Measurement Surveys (National/Provincial) 2005-06, 2007-08, 2008-09 and 2010-11.

16. Comparisons of NER across provinces indicates that Punjab has the highest NER rate (61%) in 2010-11 followed by Sindh (53%), Khyber Pakhtunkhwa (51%) and Baluchistan (47%) (PSLM 2010-11). Gender disparity is visible in all provinces, especially in Baluchistan where female NER was 35 percent, followed by KP (45%) and Sindh (48%).

Table 4:: National and Provincial NER (Percent) at Primary Level

NER 2010-11 (%)			
Province	Male (%)	Female (%)	Total (%)
Pakistan	60	53	56
Punjab	62	59	61
Sindh	57	48	53

⁸ NER= (the number of children aged 5 to 9 years attending primary level divided by the total number of children aged 5 to 9 years)*100. Enrollment in kachi has been excluded. NER encompasses all schools (public, private and other public schools).

Khyber Pakhtunkhwa	57	45	51
Balochistan	56	35	47

Source: PSLM Survey 2010-11; Pakistan Economic Survey 2011-12

2.5 Survival Rate to Grade 5

17. The percentage of students surviving to grade 5, an indicator of the system's retention rate, provides an indication of the efficiency of the education system. Based on this measure, the Pakistani education system is relatively inefficient. According to Pakistan Education Statistics Report (2011), only 51 percent of all students survived to grade 5 in Pakistan in 2010⁹.

2.6 Transition Rate (Primary-Lower Secondary)

18. According to Pakistan Education Statistics Report (2011), the transition rate from primary to secondary education across the country is less than 80 percent of those who completed grade 5 except in the Punjab province. The transition rate between grade 5 and 6 was 72 percent in KP, followed by Baluchistan 65 percent and Sindh 60 percent.

2.7 Out-of-School Children

19. Low initial enrollment, poor retention and rapid population growth help account for the increase in out-of-school children. According to the EFA Global Monitoring Report (2012), Pakistan has the world's second highest number of out-of-school children – over 5 million – out of which two thirds (3 million) are girls.

20. One explanation for the low education indicators is that successive governments in Pakistan have not allocated enough resources for education. Pakistan has consistently spent 2 percent of the GDP¹⁰ on education, which is less than what other South Asian countries are spending on education¹¹ (EFA Global Monitoring Report 2012; Pakistan Economic Survey 2009-10). A considerable amount of the country's resources are spent on defense and security. Public sector spending on defense represents 3 percent of the country's GDP in 2011-12¹² (World Bank 2013). According to the EFA Global Monitoring Report (2012), the country spends seven times more on the military than on primary education.

⁹ According to the data, 3.3 million students were enrolled in grade 1 in public primary schools in 2006 out of which only 1.7 million children were able to reach grade 5 in 2010. The survival rate has been calculated by comparing numbers of enrollments across years.

¹⁰ Pakistan allocated 2.5, 2.4, 2.1 and 2 percent of the GDP for education from 2006/07-2009/10 (Pakistan Economic Survey 2009-10). However, according to an estimate, the government is spending 3.1 percent of the GDP on education which includes private sector spending. For a detailed argument on the subject, see "The dilemma of spending 2 percent on education" (Usmani 2012).

¹¹ Public sector spending on education was 2.6 percent in Bangladesh, 3.2 in Nepal, 3.3 in India, 5.2 in Iran and 8.3 percent of GDP in Maldives (Pakistan Economic Survey 2009-10).

¹² In 2005, the number of total active army personnel was 616,000 (Chawla 2008) which has increased over the years due to Pakistan's involvement in war on terror.

21. With public spending on education, as a percentage of GDP, as low as 2 percent, the outcome with regard to education is not surprising. Pakistan is ranked 113 out of 120 countries in the Education Development Index (EFA Global Monitoring Report 2012). Education impacts other aspects of human development. Not surprisingly, Pakistan was ranked in the 141st position (out of 182 countries) in Human Development Index (HDI), which measures average achievements in three basic dimensions--i.e., health, education and income (UNDP 2011; National Commission for Human Development 2012).

22. Besides rampant poverty, with over 30% of the population living below the poverty line, there are systemic factors responsible for low educational outcomes¹³:

- 1) The shortage of school facilities within close proximity;
- 2) Absenteeism and lack of motivation among teachers;
- 3) Irrelevant curriculum and sub-standard textbooks;
- 4) Weak systems of monitoring and supervision; and
- 5) Lack of community participation.

23. Just like the Khyber Pakhtunkhwa Province, education in FATA is beset with an array of problems ranging from out of school children, deficiencies in schools and colleges, teachers' absenteeism and lack of opportunities of quality education within FATA and outside. The next section highlights some of the educational indicators in FATA.

¹³ http://unesco.org.pk/education/life/nfer_library/Reports/4-36.pdf

3. Education in FATA

1. Federally Administered Tribal Areas (FATA) is stretched along the western borders of the KP province, forming a narrow belt between the border of Afghanistan and KP. FATA comprises seven predominantly Pashtun administrative units known as tribal agencies, and six tribal areas known as Frontier Regions. FATA remains the least developed region in Pakistan, with 60 per cent of its residents living below the poverty line¹⁴. Lack of political will, years of violence and poverty have stifled the education system in FATA. Education indicators, such as, literacy rates, enrollment, survival rate to grade 5, dropout rates, transition rate from primary to lower secondary and number of out of school children, are not satisfactory and there remain opportunities for meaningful intervention.

3.1 Literacy Rates:

2. The literacy rate in FATA for 2013-14 is 24.05 percent¹⁵ and is comparatively higher for men (36.6%) than for women (10.50%). The literacy rate is well below the national average (58%) and average of KP province (51%) though FATA share similar ethno-cultural values with the KP province.

Table 5:: Literacy Rate – FATA and KP Province

Literacy Rate (%)			
Province/Region	Male (%)	Female (%)	Total (%)
KP	68	33	51
FATA	36	10	24

3.2 Primary Enrolment Rates:

3. The Gross Enrolment Ratio (GER)¹⁶ (based on the 5-9 years population) at the primary level was 39.18 percent in FATA in 2013-14. Female primary enrollment is lower (29.40%) than that for males (49.67%). As presented in Table 6, the Net Enrollment Ratio (NER) at primary level is 32.22%. Gender disparity is visible in NER as well as female NER was 23.96% as compared to male NER 41.08%. Both GER and NER are well below the national average as well as that of KP province.

¹⁴ World Development Indicators Database, World Bank, 1 July 2009

¹⁵ Annual Statistical Report 2013-14 of Government Educational Institutes, 2014, Directorate of Education FATA.

¹⁶ The GER encompasses public schools only. The GER in Private primary institutes in FATA is 8.4%, while for boys the GER is 15.8% and for girls its 1.6%

Table 6:: GER and NER (Percent) at Public Primary Level

FATA 2013-14 (%)			
Primary Enrolment Rates	Male	Female	Total
GER	49.6	29.4	39.1
NER	41.0	23.9	32.2

3.3 Survival Rates to Grade 5:

4. Survival rate to grade five is another indicator of the efficiency of education system. According to FATA Annual Statistics of Education Report (2013), the retention rate from kachi to Class-5 in Government Primary Schools over a cycle of 6 years is 32% which is way below than the national average of 51 percent. This means that 68 percent students dropout from schools in FATA before completing primary education cycle. Girls are more disadvantaged in this regard as the retention rate of girls is only 23 percent as compared to boys (39%).

3.4 Transition Rate (Primary-Lower Secondary)

5. According to FATA Annual Statistics of Education Report (2013), the transition rate from primary to secondary education (grade 5 to grade 6) in FATA is only 60 percent of those who completed grade 5. The transition rate is less than the national average and that of KP (72%). Girls get less opportunity to attend lower secondary schools in FATA as nearly 67 percent girls who complete grade 5 are unable to continue schooling beyond grade 5. Boys are considerably better off as 69 percent of them are fortunate enough to continue their schooling.

3.5 Out-of-School Children

6. Prolonged conflict in FATA, coupled with poverty and lack of educational and economic opportunities help account for the increase in out-of-school children. According to a survey conducted by National Commission for Human Development (NHCD) in 2011 of out of school children in 9 Agencies / FRs of over 250,000 households and, for the age of 4-10, nearly 200,216 children were out of school out of a total age-specific population of 340,732, i.e. nearly 59 %. A consequent survey found out the reasons for the huge number of out-of-school children. The survey reveals that child labour was the major reason for not attending schools (35%) followed by remoteness of school (18%), parents unwilling (16%), migration (7.48%) and special children (0.42%).

4. BECS and Other Mainstream Education System

1. Basic education is a fundamental human right. Government of Pakistan recognizes this right and hence is committed to meet the challenge of providing free and compulsory basic education to all children and adults and is utilizing all the available financial, technical and human resources to extend the necessary education opportunities - through formal as well as non-formal means. According to the Constitution of Pakistan:

2. The State shall “*remove illiteracy and provide free and compulsory secondary education within minimum possible period.*” (Article 37-B, Constitution of Pakistan 1973)

3. Given the gigantic scale of illiteracy in Pakistan and in order to achieve Education for All (EFA) and MDGs objectives by 2015, the Government of Pakistan is striving to provide education through formal and non-formal channels. Formal education means education or training received from institutions like schools, colleges, or universities. The public education system in Pakistan has three-tiers. These are: i) Elementary Education consisting of two stages: kachi¹⁷ and primary (grades 1 through 5); ii) secondary education (grades 6 through 12), which includes three stages: middle level (grades 6-8), secondary level (grades 9-10) and higher secondary level (grades 11-12); and iii) higher education (grade 13 and above) (UNESCO 2011; Pakistan Education Statistics 2011).

4. Non-formal education comprises all those educational activities (at all levels such as primary education, vocational training, adult literacy, functional literacy, etc.) which fall outside the purview of the formal standardized education system, endorsed by the Government of Pakistan. In Pakistan, non-formal education is provided through:

- 1) Non-formal basic education community or “home schools”;
- 2) Vocational/skill training centers/institutes;
- 3) Adult literacy/functional literacy centers; and
- 4) Deeni madrassah or religious schools.

5. After a comparison of formal and non-formal education structure in Pakistan, the following sections presents educational indicators in Khyber Pakhtunkhwa province (KP) and FATA.

¹⁷ The term kachi refers to Early Childhood Education (ECE), pre-primary or pre-grade 1 (one grade before grade 1).

4.1 Out of School Children and Need of BECS

6. According to the UNESCO statistics, 5.6 million children are out-of-school in Pakistan, two-thirds of which are girls¹⁸. Non-formal basic education community schools are an important initiative by the Government of Pakistan to enroll out of school children. Through BECS program, nearly 2.9 million out-of-school children were enrolled in schools since 2006¹⁹. BECS program is targeting female population and hence 80% of the teachers employed in BECS are female and 60% of the enrolled children are girls²⁰. The outreach of BEC program is across the country including the four provinces, Federally Administrated Tribal Area (FATA), Azad Jammu & Kashmir (AJ&K) and Islamabad (ICT). Average per student cost is less than that of formal schools and the performance is similar to formal schools. For example, per student cost born by BECS was Rs. 1,943 in 2011-12 as compared to Rs. 12,309 in formal public schools, which is six times less than the later. Also, the percentage of children completing Grade 5 from BECS is 88% in 2012-2013, which is almost similar to the pass percentage in public schools. In addition, BECS target poor children from the lower socio-economic status and focuses children in backward areas. In addition, BECS is engaging local community and other actors such as civil society to accelerate the process of socio-economic development in the country. More than 250 NGOs are patterning with BECS to educate the out-of-school children.

7. However, BECS like the rest of the formal sector schools are facing challenges that are slowing down the pace for achieving its targets. Some of the major challenges are: lack of resources to establish more schools, introduce Information Communication Technology (ICT) and establish libraries; lack of teacher training facilities, low teacher salary, irregularity in the flow of funds to supervising NGOs; and overall poor quality of monitoring by NGOs who in turn complain of inadequate supervisory funds²¹.

¹⁸ UNESCO-UIS Policy Paper 14/Fact Sheet 28 (June 2014). *Progress in getting all children to school stalls but some countries show the way forward.*

¹⁹ <http://www.becs.gov.pk/our-achievements.html>

5. TPV-Analysis KP Data

1. The Analysis is based on the Schools survey and comprehensive data capture Questionnaires, covering all aspects of the BECS. Besides physical record of the school is verified through pictures of the schools, students, registers, academic certificates, interviews/feedback from the community and members of the Village Education Committees (VECs). The Questionnaire is broadly divided into the following Sections:

1. Section-I- Basic information about the school including existing education facilities
2. Section-II-Availability of teaching material/ aids
3. Section-III-Teachers' information
4. Section-IV-Students; information
5. Section-V-Success stories
6. Section-VI-Information about The NGO and BECS staff
7. Section-VII-Information about Community
8. Section-VIII-Parents opinion
9. Section-IX-Other sources of school income
10. Section-X-School Quality

2. There are sub-sections within some of the sections, bifurcating the details for the purpose of elaboration. Section wise analysis of the information about the 1389 BECS in KP is given in the following paragraphs:

5.1 Section-I- Basic information about the school

3. Basic information about the school including existing education facilities. This Section has the following the following sub-sections:

- a. GPS Coordinates
- b. Geographic area indicating the province, district, tehsil and UC
- c. School Code and name and address
- d. Nearest available educational facility
- e. Information about the accommodation

4. The GPS indicates the physical location of the school verified by the field staff and validated by the monitoring staff. In some areas recording of the GPS was not possible due to technical constraints. However an overwhelming majority of the schools have the GPS. List of the GPS coordinates is generated and annexed to the Report. Complete information about the geographic location like district, tehsil and UC are available in the Database and shall be provided as addendum to the TPV report.

5. Information about the availability of nearest School is quite revealing. Average distance is about 3 kilometers. Some are in the range of 1 kilometers and some at a distance of 20 kilometers. Out of 1389 BECS schools, majority of the nearest schools available are government schools, followed by private school. Out of the total BECS in KP, 75% are government schools and 25% are private schools, 76% of the nearest school to BECS are primary and 24% are middle, 64% of the schools close to BECS are for boys and 35% for girls.

6. This situation is quite trendy, as the government schools are highest in number, and have the largest coverage and the largest facility. However private schools are spreading with fast speed and have a significant number of schools are more than i.e. 25%. Primary schools are 76%, indicative of the fact that primary schools have a wider coverage as compared to middle and high schools. The gender imbalance is visible in the availability of schools, which shows that the girls' schools are only 35% among the available schools and need huge investment to remove the gender disparity.

7. An overwhelming 65% of the school buildings are comprised of Teachers' home followed by community provided (17%) and rented (15%). Almost 85% of the buildings are provided by the community (teachers or community) and hence main factor the in the success of the project depends on the personal involvement of the teacher or the community. The teachers, especially female teachers gets job at home and the community gets easy way of teaching their out of school children due to any reason. This is the crux of the success of the BECS project.

5.2 Section-II-Availability of teaching material/ aids

8. The data about availability of teaching material reveals that about 51% of the schools have signboards, 81% have blackboards available, books are available in 85% of the schools, mats available in 67% schools, study charts in 58%, and Teachers Diary in 26% of the schools. However the attendance and admission registers are in adequate number, in almost 94% of the schools. This may be due to wear-tear of the consumables like mats, charts & books and there may be a mechanism for replenishment of supplies on an ongoing basis. Majority of the schools have displayed the signboards but some are without it and must be made mandatory for the teachers to display the signboards and may be made a condition for the monitoring NGO to ensure display of the signboards. The NGOs may also report the deficiency of the consumables and teaching material/aids and BECS management may replenish the items on an ongoing basis.

5.3 Section-III-Teachers' information

9. The Teachers' Information collected includes:

Table 7: Format Of Teachers' Information

Section 3 (Teacher Information)						
Teacher Code	Teacher Name	Father/Husband Name	Teacher NIC#	Present Address	Permanent Address	Contact#

10. Detail list of Teachers with the other particulars in the above tabular format will be annexed with the Report. Besides the above the following information about the Teachers have also been collected. Monthly salary is Rs. 5000 and utility charges are Rs. 1000. The information shall be annexed as addendum to the TPV Report.

Table 8: Format of Teachers' Personal Information

Teacher's Personal Information							
Appointment Date	Monthly salary along with Utility bills	Last Month of Salary received	Bank account#	Bank Branch Name	Branch Code	Bank Contact#	Bank Name with Address

Teachers Qualification

5.2 Teachers Academic Qualification

5.3 Teachers Technical Qualification

11. Majority of the Teachers (44%) have Intermediate (FA/F/Sc) qualification, followed by Matriculates who are 37%, graduates 16% and post graduates are 3% whereas a small percentage is having other qualification. Though matric /SSC is the basic qualification for the BECS teachers but majority of them (63%) are having inter or higher qualification, which positively affects the teaching quality.

Table 9: Teachers' Academic Qualification

Teacher Education				
Matric	FA/FSc	BA/BSc	MA/MSc	Others
37%	44%	16%	3%	2%

12. Majority of BECS teachers are trained. 39% of them are PTC trained, 10% are CT, 9% or B.Ed, 1% are M.Ed and 5% are others. Whereas 36% are untrained. About 74% of the teachers have got training under BECS project, out of which 48% teachers have got 7 days training and 45% teachers have got 15 days training.

Table 10: Teachers' Professional Qualification

Professional Qualification				
PTC	CT	B.Ed	M.Ed	Others
39%	10%	9%	1%	5%

13. The situation warrants training of the 36% teachers through a "Fast Track" crash programme or the BECS specially designed training program. The professional training will build their capacity in terms of pedagogy and other essentials like classroom management, student's behavior, community mobilization, students' record management etc.

14. The record shows that 17% of the teachers have been replaced/posted since last survey, which is indicative of the fact that teachers' turnover is logical which may be due to finding better regular jobs or girls get married and left the village or have been replaced by the BECS management on efficiency/disciplinary grounds etc.

Teachers Performance

15. About 1/3rd of the teachers are found with very good performance, 55% are having satisfactory performance and performance of only 4% teachers is found unsatisfactory. Majority of the teachers (at the average 64%) are found having satisfactory teaching experience, can administer classrooms, knows teaching methods and know the sitting arrangement of students as depicted in the following table:

Table 11: Teachers' Performance

Teacher's Performance						
Very Good	Satisfactory	Unsatisfactory	Teaching Experience	Classroom Administration	Teaching Method	Student Sitting Arrangement
33%	55%	4%	68%	60%	66%	67%

16. Concerted efforts are required to convert the satisfactory level of teachers' performance into very well and also bridge the gap in the indicators about teaching, classroom administration, teaching methods and student's sitting and seating arrangements.

17. The training Need Assessment indicates that 34% of the teachers need dedicated/specialized training in multi-grade teaching as one teacher is teaching alone five classes with all subjects to be covered, 38% of the teachers require training in school administration, 26% in preparation of test papers, 40% in increase in enrolment or community mobilization and retention of students and 11% in other fields. Subject specific training need assessment indicates that 19% of the teachers need training in teaching science & maths, 33% in English and 5% in other subjects. The position is depicted in the following table:

Table 12: teachers' Training Need Assessment

Type of Training Required					Training Required in Special Subjects			
Multi Grade Teaching	School Administration	Preparation of Test or Papers	Increase in Enrollment	Others	Science	Math	English	Others
34%	38%	26%	40%	11%	19%	19%	33%	5%

5.4 Section-IV-Students' information

18. This is the main focus area of the BECS Project and TPV. The survey data provides district, tehsil and UC wise information about school wise enrollment. Total enrollment in 1385 functional BECS is 48,965 out of which 15,117 are boys and 33,848 are girls. Out of the total enrollment in BECS in KP, 31% are Boys and 69% are girls. 39,014 students were found present on the day of validation out of which 11,851 were boys and 27,163 were girls. The present percentage in boys was 78% and in girls was 80%. This trend indicates that a high proportion of girls are getting benefit out of the BECS. The number of girls across the classes is higher than boys, transpiring the fact that higher number of girls are out of school and facing the issue of access to schools and BECS has plugged that gap and secondly the teachers are predominantly females, with whom the girls and their families feel comfortable to continue education. However the gender parity index has dropped in 5th class which could be attributed to girls' age, cultural issues and their opportunity cost at home. This trend is in harmony with the girls' enrollment and retention in mainstream conventional government schools. The comparative position is presented in the following table:

Table 13: Enrollment & Dropouts

Enrollment													
Kachi		One		Two		Three		Four		Five		Total	
Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls
4709	8492	3048	6838	2299	5751	2068	4755	1663	4473	1330	3539	15117	33848
36%	64%	31%	69%	29%	71%	30%	70%	27%	73%	27%	73%	31%	69%
Dropout													
		35%	19%	25%	16%	10%	17%	20%	6%	20%	21%		

19. Dropout rate is in normal range, commensurate with other govt. schools. The ratio of dropout is further high in boys in all class levels except class three. Average dropout in girls is 16% whereas average dropout in boys is 22%. This ratio of dropout or retention is in congruence with the dropout rate in KP’s government primary schools. The lower dropout in girls advocates the passion and commitment in girls for getting education. However the situation requires policy reforms under Article 25A of the constitution about free and compulsory school level education. All the provinces have promulgated the Right to Education Acts except KP. The Federal Government has also made legislation for right of free & compulsory education. The Acts will not only ensure admission of out of school children but will also ensure their retention in schools.

20. The attendance situation on the day of TPV survey is satisfactory being above 79% at the average. The class wise attendance of girls is higher than boys across the classes from Kachi to fifth grade. This is indicative of the fact that BECS are close to community and close to girls and girls are more regular, punctual and serious in studies as compared to boys. This argument finds further strength from the increase in girl’s attendance with the rise in class level from Kachi to fifth, which shows the commitment and degree of importance the girls’ attach with education as they get maturity. This is quite revealing fact of the TPV. The position is presented in the following Table:

Table 14: Students Attendance on the Day of Survey

Students Present on the Day of TPV Survey													
Kachi		One		Two		Three		Four		Five		Total	
Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls
3599	6587	2345	5392	1780	4668	1687	3820	1361	3722	1079	2974	11851	27163
76%	78%	77%	79%	77%	81%	82%	80%	82%	83%	81%	84%	78%	80%

21. District wise enrollment of boys and girls is in line with the number female and male teachers in BECS in KP. As majority of BECS have female teachers, thereby attracting more girls and retains them. The ratio of girls is above 50% in all BECS going as high as 78% in Charsadda. The attendance position is better in girls but arbitrary among districts and above normal situation in other governmental schools. The following table explains it further.

Table 15: Total Enrollment and Attendance on the Day of TPV

District Wise Enrollment & Attendance in KP						
District	Enrolled			Present		
	Boys	Girls	Total	Boys	Girls	Total
Abbottabad	741	900	1,641	603	684	1,287
Bannu	794	2,393	3,187	413	1,513	1,926
Battagram	206	217	423	165	165	330
Buner	424	911	1,335	416	874	1,290
Charsadda	1,160	2,884	4,044	957	2,009	2,966
Chitral	928	1,613	2,541	570	1,097	1,667
D.I Khan	1,346	3,216	4,562	1,118	2,619	3,737
Dir Lower	504	1,818	2,322	463	1,576	2,039
Dir Upper	355	630	985	226	474	700
Hangu	418	1,258	1,676	396	1,320	1,716
Haripur	368	532	900	303	459	762
Karak	248	437	685	202	375	577
Kohat	271	749	1,020	244	689	933

Lakki Marwat	427	1,036	1,463	336	903	1,239
Malakand	1,395	2,063	3,458	840	1,194	2,034
Mansehra	255	403	658	210	284	494
Mardan	1,120	2,685	3,805	721	1,738	2,459
Nowshera	533	1,324	1,857	443	1,109	1,552
Peshawar	783	1,661	2,444	702	1,498	2,200
Shangla	433	482	915	410	472	882
Swabi	1,780	4,754	6,534	1,522	4,195	5,717
Swat	628	1,882	2,510	591	1,916	2,507
Total	15,117	33,848	48,965	11,851	27,163	39,014

22. The percentage of students who left school during study period is better than the percentage of students leaving school in traditional government schools in KP. Average ratio is 7% in boys and 6% in girls, whereas class wise school leaving rate is higher in girls than boys. The rate of school leaving is in harmony with the prevailing socio-economic conditions, parental literacy, opportunity cost etc. The position is summarized in the following Table:

Table 16: Students Those left School

School leaving Students													
Kachi		One		Two		Three		Four		Five		Total	
Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls
12%	15%	6%	17%	9%	21%	13%	21%	12%	29%	12%	25%	7%	6%

23. Major reasons of leaving school are poverty 8%, no books 37%, migration 22%, and lack of parents' interest 8%, admission in other govt. schools 7%. The other factors are beyond the control of BECS but timely provision of text books is essential for retention and control over the dropout due to books. This issue calls for reforms, in the books delivery mechanism, by reporting books deficiency on monthly basis and ensuring timely delivery of books within the next month after the report. The parents could be persuaded through counselling and motivation by activation of VECs. Students' interest can be built by special attention by the teachers to such vulnerable children.

Table 17: Reasons for Leaving School

Reasons for Leaving School												
Pov erty	Lack of Inter est in Stud ies	Admis sion in Govt. Schoo l	No Bo oks	Chil d Lab our	Sickn ess	Punish ment	Teach er's Altitu de	Insec urity	Harve sting	Migra tion	Lack of Pare nt's Inter est	Oth ers
8%	5%	7%	37 %	2%	0%	1%	1%	3%	2%	22%	8%	4%

24. The students assessment is judged on four scales i.e. to be very good, good, Satisfactory and unsatisfactory. The results are improving with the progression of classes/levels. The ratio of very good and good results is improving, reducing the satisfactory slab and this ratio attains the maximum in fifth class, where students get maturity and start understanding things. A small percentage is performing below satisfactory level, which is normal at school level. May be they are admitted late or casual in attendance or lack of parental interest or other socio-economic factors. However the improvement in performance with the rise in grades is encouraging. The following two tables depicts the position of student's assessment in the 6 primary level classes, taught by a single teacher:

Table 18: Students Assessment

Student Assessment Kachi				Student Assessment One				Student Assessment Two			
Ver y Go od	Go od	Satisfac tory	Unsatisfac tory	Ver y Go od	Go od	Satisfac tory	Unsatisfac tory	Ver y Go od	Go od	Satisfac tory	Unsatisfac tory
7%	19 %	72%	2%	14 %	35 %	48%	3%	13 %	36 %	48%	3%

25. The percentage of very good is highest in 5th level. The Good category is also stable and increasing and the satisfactory slab is being taken over by the very good and good categories. This pattern is better than the assessment in conventional regular government schools.

Table 19: Students Assessment

Student Assessment Three				Student Assessment Four				Student Assessment Five			
Ver y Go od	Go od	Satisfac tory	Unsatisfa ctory	Ver y Go od	Go od	Satisfac tory	Unsatisfa ctory	Ver y Go od	Go od	Satisfac tory	Unsatisfa ctory
13 %	34 %	49%	5%	14 %	39 %	43%	4%	18 %	28 %	49%	4%

26. The pass percentage in both boys and girls is quite high. Fail are 26% and 7%, which is higher than normal in boys and less than normal in girls. The result of students appeared in 5th grade exam is same in percentage terms for both boys and girls. The absolute number of failed students is higher for boys but both have a pass percentage of 74%. This is more encouraging in case of girls, who secured higher position in pass percentage with boys.

Table 20: Students Pass Percentage

Students Appeared in Fifth Exam BOYS in year 2015		Students Appeared in Fifth Exam GIRLS in year 2015	
Fail	Pass	Fail	Pass
26%	74%	7%	93%

27. Track record of male students who appeared and qualified the fifth grade between 2007 to 2015 reveals that the pass percentage is about 87%, which is quite encouraging and indicative of the focused and intensive teaching environment in BECS. This percentage is higher than the pass percentage in 5th grade in the traditional government primary schools in KP.

Table 21: Track Record of Students who Passed 5th -Boys

Students Appeared and Passed 5 th Grade Between 2007 and 2015 BOYS																	
2007	2008	2009	2010	2011	2012	2013	2014	2015	2010	2011	2012	2013	2014	2015	2010	2011	2015
Ap pea red	Pa ss ed	Ap pea red	Pa ss ed	Ap pea red	Pa ss ed	Ap pea red	Pa ss ed	Ap pea red	Pa ss ed	Ap pea red	Pa ss ed	Ap pea red	Pa ss ed	Ap pea red	Pa ss ed	Ap pea red	Pa ss ed
	85 %		86 %		89 %		91 %		88 %		90 %		80 %		80 %		92 %

28. The trend of result in Girls is better than boys. The girls have outperformed boys in majority of the years under review between 2007-2015. The average pass percentage in girls is 89%, two percentage points above the boys. This is indicative of the dedication and interest of girls in education and learning.

Table 22: Track Record of Students who Passed 5th -Girls

Students Appeared and Passed 5 th Grade Between 2007 and 2015 GIRLS																	
2007	2008	2009	2010	2011	2012	2013	2014	2015	2007	2008	2009	2010	2011	2012	2013	2014	2015
Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared
	87%		86%		87%		87%		88%		91%		93%		90%		91%

29. The outcome of BECS is literacy and continuation of education which is visible in continuation of the education by the students taking admission in 6th class. A significant number of students get admission in 6th grade as evident from the following table, which indicates that during the last three years the admission rate in class 6th is above 80 percentage of students passed in 5th class who gets admission in 6th grade:

Table 23: Students Admitted in 6th Grade-Boys

Students Admitted in 6 th Class Between 2007 and 2015 BOYS								
2007	2008	2009	2010	2011	2012	2013	2014	2015
69%	73%	72%	67%	66%	54%	85%	91%	89%

30. The situation of continuation of education in Girls is worth attention. The trend of admissions in 6th grade in girls is lower than the boys, which is indicative of the socio-economic factors hindering girl's education at higher level, particularly in rural areas. Secondly non-availability of schools within reach for a 6th grade girl to travel safely is another big issue. The

poverty, parental preference and priorities and opportunity cost of girls further hinders the admission in 6th grade. BECS has plugged the access issue at primary level but there is no such arrangement at middle and high school levels and hence it becomes difficult for the female students to continue, owing to long distances to be travelled, which involves both security and cost of travelling and hence discontinuation of education beyond 5th grade. This is the only area where the girls are compelled to discontinue their education. The following table explains the position viz-a-viz boys who's higher percentage continue their education, not confronting the factors affecting girls' education:

Table 24: Students Admitted in 6th Grade-Girls

Students Admitted in 6 th Class Between 2007 and 2015 GIRLS								
2007	2008	2009	2010	2011	2012	2013	2014	2015
68%	66%	74%	69%	70%	46%	65%	72%	78%

31. The students were asked to indicate their preferred training which they would like to seek after the primary level graduation. The findings are quite heart touching and revealing. An overwhelming majority 33% desired to seek higher education, which shows the urge and interest of the children by recognizing the importance of education. But they are unfortunate by not having the educational institutions within reach and their lack of financial resources to afford off-village education. BECS is doing a GREAT job by providing education opportunities to such unfortunate children.

32. The second preferred option is the training in IT (21%), which shows the awareness in children about the advantages, importance and future of IT. The third preferred training that the children would like to acquire is handicrafts (16%) followed by Embroidery (13%) and beautician 5%. All these three are the preferred subjects of girls. Thus the govt. may enhance the opportunities for higher education, IT training and skill centers for girls where they can learn handicrafts, embroidery and beauticians like skills. The tables presents the comparative priorities of training:

Table 25: Preferred Type of Training after Education

Preferred Type of Training after Education												
Electrician	Computer	Handicrafts	Plumber	Mobile Repair	Auto mechanic	Beautician	Embroidery	Bes	Vegetables	Envelops Making	Higher Education	Others
5%	21%	16%	1%	2%	1%	5%	13%	1%	3%	0%	33%	1%

5.5 Section VI- X Misc: Information

33. Almost all the teachers reported that the attitude and behavior of the NGO's monitoring Supervisor as well as BECS monitoring officers is friendly and the negative replies in this regards are insignificant. Five Schools are found non-functional as per breakup:

Chitral	CL-108
D.I.Khan	DK-152
Charsadda	CR-100
Abbottabad	AA-105
Kohat	KT-39

34. 71% of the VECs were found functional, whereas the others are required to be activated and made functional and the community involved in the affairs of the BECS. About 97% of the parents whose opinion was sought during the survey were found satisfied from the teaching. Corporal punishment, do children work for the teacher or do they pay fine were found insignificant. All the schools are functional except 75 which are being verified once again and the correct situation shall be reported in the final report. Performance of 53% of the functional schools is satisfactory, 38% is very good and only 4% is weak. 62% of the closed non-functional schools are due to lack of teacher's interest, 19% were closed on the day of visit of the TPV team, 10% are closed by BECS administration and 10% are non-functional due to lack of students.

6. TPV-Analysis FATA Data

1. The Analysis is based on the Schools survey and comprehensive data capture Questionnaires, covering all aspects of the BECS. Besides physical record of the school is verified through pictures of the schools, students, registers, academic certificates, interviews/feedback from the community and members of the Village Education Committees (VECs). The Questionnaire is broadly divided into the following Sections:

11. Section-I- Basic information about the school including existing education facilities
12. Section-II-Availability of teaching material/ aids
13. Section-III-Teachers' information
14. Section-IV-Students; information
15. Section-V-Success stories
16. Section-VI-Information about The NGO and BECS staff
17. Section-VII-Information about Community
18. Section-VIII-Parents opinion
19. Section-IX-Other sources of school income
20. Section-X-School Quality

2. There are sub-sections within some of the sections, bifurcating the details for the purpose of elaboration. Section wise analysis of the information about the 840 schools out of 970 BECS in FATA is given in the following paragraphs:

6.1 Section-I- Basic information about the school

3. Section-I- Basic information about the school including existing education facilities. This Section has the following the following sub-sections:

- f. GPS Coordinates
- g. Geographic area indicating the province, district, tehsil and UC
- h. School Code and name and address
- i. Nearest available educational facility
- j. Information about the accommodation

4. Record of GPS indicates the physical verification of the school by the field staff and validation by the monitoring staff. In some areas recording of the GPS was not possible due to technical constraints. However an overwhelming majority of the schools have the GPS. List of the GPS coordinates generated and annexed to the Report. Complete information about the geographic

location like district, tehsil and UC are available in the Database and shall be provided as addendum to the TPV report.

5. Information about the availability of nearest School is quite revealing. Average distance is about 3 kilometers. Some are in the range of 1 kilometers and some at a distance of 20 kilometers. Out of 840 BECS schools, majority of the nearest schools available are government schools, followed by private school. Out of the total BECS in KP, 77% are government schools and 23% are private schools, 70% of the nearest school to BECS are primary and 30% are middle, 75% of the schools close to BECS are for boys and 25% for girls. This phenomenon is indicative of the fact that schools for girls are not only short of demand but far less than boys' schools.

6. This situation is quite trendy, as the government schools are highest in number, and have the largest coverage and the largest facility. However private schools are spreading with speed and have a significant number of schools like 23%. Primary schools are 70%, indicative of the fact that primary schools have a wider coverage as compared to middle and high schools. The gender imbalance is visible in the availability of schools, which shows that the girls' schools are only 25% among the available schools and need huge investment to remove the gender disparity.

7. An overwhelming 33% of the school buildings are comprised of Teachers' home and community provided (33%) and rented (31%). Almost 66% of the buildings are provided by the community (teachers or community) and hence main factor the success of the project depends on the personal involvement of the teacher or the community. The teachers, especially female teachers gets job at home and the community gets easy way of teaching their out of school children due any reason. This is the crux of the success of the BECS project.

6.2 Section-II-Availability of teaching material/ aids

8. The data about availability of teaching material reveals that only 17% of the schools have signboards (may be due to security threats), 86% have blackboards available, books are available in 74% of the schools, mats available in 77% schools, study charts in 39%, and Teachers Diary in 13% of the schools. However the attendance and admission register are in adequate number, in almost 90% of the schools. This may be due to wear-tear of the consumables like mats, charts & books and there may be a mechanism for replenishment of supplies on an ongoing basis. Majority of the schools have displayed the signboards but some are without it and must be made mandatory for the teachers to display the signboards and may be made a condition for the monitoring NGO to ensure display of the signboards. The NGOs may also report the deficiency of the consumables and teaching material/aids and BECS management may replenish the items on an ongoing basis.

6.3 Section-III-Teachers' information

9. The Teachers' Information collected includes:

Table 26: Format of Teachers' Information

Section 3 (Teacher Information)						
Teacher Code	Teacher Name	Father/Husband Name	Teacher NIC#	Present Address	Permanent Address	Contact#

10. Detail list of Teachers with the other particulars in the above tabular format will be annexed with the Report. Besides the above the following information about the Teachers have also been collected. Monthly salary is Rs. 5000 and utility charges are Rs. 1000. The information shall be annexed as addendum to the TPV Report.

Table 27: Format of Teachers' Personal Information

Teacher's Personal Information							
Appointment Date	Monthly salary along with Utility bills	Last Month of Salary received	Bank account#	Bank Branch Name	Branch Code	Bank Contact#	Bank Name with Address

Teachers Qualification

6.2 Teachers Academic Qualification

6.3 Teachers Technical Qualification

11. Majority of the Teachers (36%) have Intermediate (FA/F/Sc) qualification, followed by Matriculates who are 24%, graduates 26% and post graduates are 19% whereas a small percentage is having other qualification. Though matric /SSC is the basic qualification for the BECS teachers but majority of them (63%) are having inter or higher qualification, which positively affects the teaching quality.

Table 28: Teachers' Academic Qualification

Teacher Education				
Matric	FA/FSc	BA/BSc	MA/MSc	Others
24%	36%	26%	19%	1%

12. Majority of BECS teachers are trained. 38% of them are PTC trained, 8% are CT, 8% or B.ED, 1% are M.ed and 7% are others. Whereas 37% are untrained. About 70% of the teachers have got training under BECS project, out of which 21% teachers have got 7 days training and 58% teachers have got 15 days training.

Table 29: Teachers' Professional Qualification

Professional Qualification				
PTC	CT	B.Ed	M.Ed	Others
38%	8%	8%	1%	7%

13. The situation warrants training of the 37% teachers through a "Fast Track" crash programme or the BECS specially designed training program. The professional training will build their capacity in terms of pedagogy and other essentials like classroom management, student's behavior, community mobilization, students' record management etc.

14. The record shows that 17% of the teachers have been replaced/posted since last survey, which is indicative of the fact that teachers turnover is logical which may be due to finding better regular or girls married and left the village or have been replaced by the BECS management on efficiency/disciplinary grounds etc.

Teachers Performance

15. About 2/5th of the teachers are found with very good performance, 41% are having satisfactory performance and performance of only 7% teachers is found unsatisfactory. Majority of the teachers (at the average 65%) are found having satisfactory teaching experience, can

administer classrooms, knows teaching methods and know the sitting arrangement of students as depicted in the following table:

Table 30: Teachers' Performance

Teacher's Performance						
Very Good	Satisfactory	Unsatisfactory	Teaching Experience	Classroom Administration	Teaching Method	Student Sitting Arrangement
39%	41%	7%	65%	59%	64%	65%

16. Concerted efforts are required to convert the satisfactory level of teachers' performance into very well and also bridge the gap in the indicators about teaching, classroom administration, teaching methods and student's sitting and seating arrangements.

17. The training Need Assessment indicates that 36% of the teachers need dedicated/specialized training in multi-grade teaching as one teacher is teaching alone five classes with all subjects to be covered, 59% of the teachers require training in school administration, 19% in preparation of test papers, 37% in increase in enrolment or community mobilization and retention of students and 18% in other fields. Subject specific training need assessment indicates that 14% & 11% of the teachers need training in teaching science & maths respectively, 8% in English and 3% in other subjects. The position is depicted in the following table:

Table 31: Teachers' Training Need Assessment

Type of Training Required					Training Required in Special Subjects			
Multi Grade Teaching	School Administration	Preparation of Test or Papers	Increase in Enrollment	Others	Science	Math	English	Others
36%	59%	19%	37%	18%	14%	11%	8%	3%

6.4 Section-IV-Students' information

18. This is the main focus area of the BECS Project and TPV. The survey data provides school, agency, tehsil and village wise information about school wise enrollment. Total enrollment in 837 BECS (130 schools are inaccessible in North and South Waziristan and 3 are non-functional in other areas and 1 was not there) is 42,646 out of which 29,307 are boys and 13,339 are girls. Out of the total enrollment in BECS in FATA, 69% are Boys and 31% are girls. The enrollment has improved and the total enrollment may add about 6000-7000 students if the inaccessible schools are taken into account. 37,335 students were found present on the day of validation out of which 24,829 were boys and 12,506 were girls. The present percentage in boys was 85% and in girls was 94%. This trend indicates that a high proportion of girls are getting benefit out of the BECS in FATA. The number of girls in Kachi class are 1/3rd of boys (30%). This ratio goes steady in higher Classes. However the Gender parity index has dropped in 5th which could be attributed to girls' age in 5th grade, cultural issues and their opportunity cost. This trend is in harmony with the girl's enrollment and retention in mainstream conventional government schools in FATA. The comparative position is presented in the following table:

Table 32: Enrollment & Dropout

Enrollment													
Kachi		One		Two		Three		Four		Five		Total	
Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls
7756	3258	5364	2538	4826	2713	4525	2027	3916	1645	2920	1158	29307	13339
70%	30%	68%	32%	64%	36%	69%	31%	70%	30%	72%	28%	69%	31%
Dropout													
		31%	22%	10%	-7%	6%	25%	13%	19%	25%	30%		

19. Dropout rate is in normal range commensurate with other govt. schools in FATA. The ratio of dropout in girls is low between Kachi and class two but has increased in higher classes. Average dropout is 18% whereas average dropout in boys is 17% and in girls is 18%. This ratio of dropout or retention is in congruence with the dropout rate in FATA's government primary schools.

However the situation requires policy reforms under Article 25A of the constitution about free and compulsory school level education. All the provinces have promulgated the Right to Education Acts except KP. The Federal Government has also made legislation for right of free & compulsory education, which may be extended to FATA. The Acts will not only ensure admission of the out of school children but will also ensure their retention in schools.

20. The attendance situation on the day of TPV survey is satisfactory being above 90% at the average. The class wise attendance of girls is more than boys across the classes from Kachi to fifth grade. This is indicative of the fact that BECS are close to community and close to girls and girls are more regular, punctual and serious in studies as compared to boys. This argument finds further strength from the increase in girl's attendance with the rise in class level from Kachi to fifth, which shows the commitment and degree of importance the girls attach to education as they get maturity. This is quite revealing fact of the TPV. The position is presented in the following Table:

Table 33: Students Present on the Day of TPV Survey

Students Present on the Day of TPV Survey													
Kachi		One		Two		Three		Four		Five		Total	
Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls
5768	3098	4736	2524	4339	2602	3814	1726	3574	1524	2598	1032	24829	12506
74%	95%	88%	99%	90%	96%	84%	85%	91%	93%	89%	89%	85%	94%

21. The enrollment is in line with the socio-economic condition of the respective agency. Like girls enrollment is above 40% of total enrollment in the agency in the Orakzai, Khyber and Kurram. Literacy rate in these agencies is also high. The agency wise attendance ratio is high in girls as compared to boys.

Table 34: Number of Students Enrolled and Present on the Day of TPV

District	Enrolled			Present		
	Boys	Girls	Total	Boys	Girls	Total
Bajawar Agency	8613	3089	11702	6237	2470	8707
FR Bannu	1372	617	1989	1359	632	1991
FR Tank	31	142	173	31	142	173
Khyber Agency	1464	1080	2544	1460	1305	2765

Kurram Agency	2568	1922	4490	2104	1917	4021
Mohmand Agency	11079	4289	15368	9742	3821	13563
NWA	2343	1072	3415	2264	1068	3332
Orakzai	1106	881	1987	957	877	1834
SWA	731	247	978	675	274	949
Grand Total	29307	13339	42646	24829	12506	37335

22. The percentage of students who left school during study period is better from the percentage of students leaving schools in traditional government schools in KP. Average ratio is 9% in boys and 11% in girls, whereas class wise school leaving rate is higher in girls than boys. The rate of school leaving is in harmony with the prevailing socio-economic conditions, parental literacy, opportunity cost etc. The position is summarized in the following Table:

Table 35: Students who left School

School leaving Students													
Kachi		One		Two		Three		Four		Five		Total	
Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls
10%	13%	9%	11%	7%	7%	10%	10%	8%	11%	8%	15%	9%	11%

23. Major reasons of leaving school are poverty 37%, no books 2%, migration 6%, and lack of parents' interest 19%, admission in other govt. schools 8%. The other factors are beyond the control of BECS but timely provision of text books is essential for retention and control over the dropout due to books. This issue calls for reforms, in the books delivery mechanism, by reporting books deficiency on monthly basis and ensuring timely delivery of books within the next month after the report. The parents could be persuaded through counselling and motivation by activation of VECs. Students' interest can be built by special attention by the teachers to such vulnerable children.

Table 36: Reasons for Leaving School

Reasons for Leaving School												
Pove rty	Lack of Inter est in Studi es	Admis sion in Govt. School	No Boo ks	Chil d Lab our	Sickn ess	Punish ment	Teach er's Altitu de	Insecu rity	Harves ting	Migrat ion	Lack of Pare nt's Inter est	Oth ers
37%	7%	8%	2%	2%	2%	0%	0%	7%	1%	6%	19%	10%

24. The students assessment is judged on four scales i.e. to be very good, good, Satisfactory and unsatisfactory. The results are improving with the progression of classes/levels. The ratio of very good and good results is improving, reducing the satisfactory slab and this ratio attains the maximum in fifth class, where students get maturity and start understanding things. A small percentage is performing below satisfactory level, which is normal at school level. May be they are admitted late or casual in attendance to lack of parental interest or other socio-economic factors. However the improvement in performance with the rise in grades is encouraging. The following two tables depicts the position of student's assessment in the 6 primary level classes, taught by a single teacher.

Table 37: Students Class-wise Assessment

Student Assessment Kachi				Student Assessment One				Student Assessment Two			
Ver y Go od	Go od	Satisfac tory	Unsatisfa ctory	Ver y Go od	Go od	Satisfac tory	Unsatisfa ctory	Ver y Go od	Go od	Satisfac tory	Unsatisfa ctory
8%	10 %	81%	1%	27 %	34 %	34%	5%	26 %	36 %	33%	5%

25. The percentage of very good is highest in 3rd, 4th and 5th level. The Good category is also stable and increasing and the satisfactory is being taken over by the very good and good categories. This pattern is better than the assessment in conventional regular government schools.

Table 38: Students Class-wise Assessment

Student Assessment Three				Student Assessment Four				Student Assessment Five			
Ver y Go od	Go od	Satisfac tory	Unsatisfa ctory	Ver y Go od	Go od	Satisfac tory	Unsatisfa ctory	Ver y Go od	Go od	Satisfac tory	Unsatisfa ctory
26 %	39 %	28%	7%	30 %	39 %	25%	5%	36 %	25 %	34%	5%

26. The pass percentage in both boys and girls is quite high. Fail are 6% and 15% in boys and girls respectively, which is less than normal. The result of students appeared in 5th grade exam is same in percentage terms for both boys and girls. The absolute number of failed students is higher for boys but both have a pass percentage of 94%. This is more encouraging in case of girls, who secured equal position in pass percentage with boys.

Table 39: Students Pass Percentage

Students Appeared in Fifth Exam BOYS in year 2015		Students Appeared in Fifth Exam GIRLS in year 2015	
Fail	Pass	Fail	Pass
6%	94%	15%	85%

27. Track record of Boys who appeared and qualified the fifth grade between 2007 to 2015 reveals that the pass percentage is about 88%, which is quite encouraging and indicative of the focused and intensive teaching environment in BECS. This percentage is higher than the pass percentage in 5th grade in the traditional government primary schools in KP.

Table 40: Students Passed 5th Grade between 2007 and 2015 BOYS

Students Appeared and Passed 5 th Grade Between 2007 and 2015 BOYS																	
2007	2007	2008	2008	2009	2009	2010	2010	2011	2011	2012	2012	2013	2013	2014	2014	2015	2015
Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed
	85%		86%		90%		90%		88%		89%		78%		89%		92%

28. The trend of result in Girls is satisfactory. The girls have outperformed boys in 2013- and 2014 and have maintained a uniform trend during the period under review between 2007-2015. Their average pass percentage in girls is 84%, four percentage points less than the boys. This is indicative of the dedication and interest of girls in education and learning in an unfavorable environment in FATA.

Table 41: Students Passed 5th Grade between 2007 and 2015 GIRLS

Students Appeared and Passed 5 th Grade Between 2007 and 2015 GIRLS																	
2007	2007	2008	2008	2009	2009	2010	2010	2011	2011	2012	2012	2013	2013	2014	2014	2015	2015
Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed	Appeared	Passed
	80%		79%		83%		82%		85%		85%		86%		90%		86%

29. The outcome of BECS is literacy and continuation of education, which is visible in continuation of the education by the students taking admission in 6th class. A significant number of students get admission in 6th grade as evident from the following table, which indicates that above 45 percentage of boys passed in 5th class get admission in 6th grade.

Table 42: Students Admitted in 6th Class between 2007 and 2015 BOYS

Students Admitted in 6 th Class Between 2007 and 2015 BOYS								
2007	2008	2009	2010	2011	2012	2013	2014	2015
54%	51%	43%	43%	41%	36%	47%	42%	43%

30. The situation of continuation of education in Girls is worth attention. The trend of admissions in 6th grade in girls is lower than the boys, which is indicative of the socio-economic factors hindering girl's education at higher level particularly in rural areas. Secondly non-availability of schools within reach for a 6th grade girl to travel safely is another big issue. The poverty, parental preference and priorities and opportunity cost of girls hinders the admission in 6th grade. BECS has plugged the access issue at primary level but there is no such arrangement at middle and high school level and hence it becomes difficult for the female students to continue, owing to long distances to be travelled which involves both security and cost of travelling and hence discontinuation of education beyond 5th grade. This is the only area where the girls are compelled to discontinue their education. The following table explains the position viz-a-viz boys who's higher percentage continue their education, not confronting the situation faced by girls:

Table 43: Students Admitted in 6th Class between 2007 and 2015 GIRLS

Students Admitted in 6 th Class Between 2007 and 2015 GIRLS								
2007	2008	2009	2010	2011	2012	2013	2014	2015
40%	39%	30%	30%	31%	31%	32%	33%	44%

31. The students were asked to indicate their preferred training which they would like to seek after the primary level graduation. The findings are quite heart touching and revealing. An overwhelming majority 29% desired to seek higher education, which shows the urge and interest of the children by recognizing the importance of education. But they are unfortunate by not having the educational institutions within reach and their lack of financial resources to afford off-village education. BECS is doing a GREAT job by providing education opportunities to such unfortunate children.

32. The second preferred option is the training in IT (33%), which shows the awareness in children about the advantages, importance and future of IT. The third preferred training that the children would like to acquire is handicrafts (3%) followed by Embroidery (11%) and beautician 6%. All these three are the preferred subjects of girls. Thus the govt. may enhance the opportunities for higher education, IT training and skill centers for girls where they can learn handicrafts, embroidery and beauticians like skills. The tables presents the comparative priorities of training:

Table 44: Preferred Type of Training after Education

Preferred Type of Training after Education												
Electri cian	Comp uter	Handic rafts	Plum ber	Mo bile Rep air	Auto mech anic	Beaut ician	Embro idery	Be es	Veget ables	Envel ops Maki ng	Highe r Educa tion	Oth ers
7%	33%	3%	1%	3%	2%	6%	11%	2 %	2%	0%	29%	2%

6.5 Section VI-X- Misc: Information

33. Almost all the teachers reported that the attitude and behavior of the NGO's monitoring Supervisor as well as BECS monitoring officers is friendly and the negative replies in this regards

are insignificant. 55 and 75 schools are inaccessible in North & South Waziristan respectively Whereas three Schools are found non-functional as per breakup:

1	Bajour	BA-67
2		BA-68
3		BA-69

34. 69% of the VECs were found functional, whereas the others are required to be activated and made functional and the community involved in the affairs of the BECS. About 88% of the parents whose opinion was sought during the survey were found satisfied from the teaching. Corporal punishment, do children work for the teacher or do they pay fine were found insignificant. All the schools are functional except 61 which are being verified once again and the correct situation shall be reported in the final report. Besides 55 schools in North and 75 schools in south Waziristan are in operation area/IDPs of inaccessible. Performance of 63% of the functional schools is very good and 36% is satisfactory and only 1% is weak. The closed/non-functional schools are due to lack of teacher's interest/absenteesim and closed by BECS administration.

7. Success Stories

Success Story of Miss Ghazal

- Name of Student: Ghazal
- F/Name: Shah Fareed
- Roll no 01
- Year of Passing Class 5th 2006
- Home Address Qazia Choke Fatima Mail Bannu
- Contact 03329723419
- School Code: BN 116
- District: Bannu
- Teacher's Name: Saima Shah

Current Status

- Studying in Bannu Medical College

Background

- Contact 03439191071
- School Code: Ba 137
- District: Bajwar Agency
- Teacher's Name: Muhammad Shoaib

Current Status

- Passed ETEA test and currently studying on scholarship

8. Key Findings

The Third Party Validation (TPV) is a comprehensive exercise and has made some very important strategic and policy level findings to be helpful in reshaping the strategic plans and policies for promotion of education in the country and in KP and FATA in particular. Following are the major findings of the TPV in both KP & FATA:

- 1) Average distance is about 3 kilometers. Some are in the range of 1 kilometers and some at a distance of 20 kilometers. Out of 1391 BEC schools in KP and 840 BEC Schools in FATA, majority of the nearest schools available are government schools, followed by private school. Out of the total BECS in KP, 75% are government schools and 25% are private schools, 76% of the nearest school to BECS are primary and 24% are middle, 64% of the schools close to BECS are for boys and 35% for girls.
- 2) The government schools are highest in number, and have the largest coverage and the largest education facility. However private schools are spreading with fast speed and have a significant number of schools like 25% of all schools. Primary schools are 76%, indicative of the fact that primary schools have a wider coverage as compared to middle and high schools. The gender imbalance is visible in the availability of schools, which shows that the girls' schools are only 35% among the available schools and need huge investment to remove the gender disparity.
- 3) 65% of the school buildings are comprised of Teachers' home followed by community provided (17%) and rented (15%). Almost 85% of the buildings are provided by the community (teachers or community) and hence main factor the success of the project depends on the personal involvement of the teacher or the community. The teachers, especially female teachers gets job at home and the community gets easy way of teaching their out of school children due any reason. This is the crux of the success of the BECS project.
- 4) 51% of the schools have signboards, 81% have blackboards available, books are books available in 85% of the schools, mats available in 67% schools, study charts in 58%, and Teachers Diary in 26% of the schools. However the attendance and admission register are in adequate number, in almost 94% of the schools. The NGOs may report the deficiency of the consumables and teaching material/aids and BECS management may replenish the items on an ongoing basis.
- 5) 44% of the teachers have Intermediate (FA/F/Sc) qualification, followed by Matriculates who are 37%, graduates 16% and post graduates are 3% whereas a small percentage is having other qualification. Though matric /SSC is the basic qualification for the BECS teachers but majority of them (63%) are having inter or higher qualification, which positively affects the teaching quality.

- 6) Majority of BECS teachers are trained. 39% of them are PTC trained, 10% are CT, 9% are B.Ed, 1% are M.Ed and 5% are others. Whereas 36% have got no formal training. About 74% of the teachers have got training under BECS project, out of which 48% teachers have got 7 days training and 45% teachers have got 15 days training. The situation warrants training of the 36% teachers through a “Fast Track” crash programme or the BECS specially designed training program. The professional training will build their capacity in terms of pedagogy and other essentials like classroom management, student’s behavior, community mobilization, students’ record management etc.
- 7) About 1/3rd of the teachers are found with very good performance, 55% are having satisfactory performance and performance of only 4% teachers is found unsatisfactory. Majority of the teachers (at the average 64%) are found having satisfactory teaching experience, can administer classrooms, knows teaching methods and knows the sitting arrangement of students.
- 8) 34% of the teachers need dedicated/specialized training in multi-grade teaching as one teacher is teaching five classes alone with all subjects to be covered, 38% of the teachers require training in school administration, 26% in preparation of test papers, 40% in increase in enrolment or community mobilization and retention of students and 11% in other fields. Subject specific training need assessment indicates that 19% of the teachers need training in teaching science & maths, 33% in English and 5% in other subjects.
- 9) The general trend in performance indicators in KP and FATA has harmony due to similarity in socio-economic situation, culture and close interaction of KP and FATA. However male-female enrollment and survival rates are a bit different, owing to the fact that majority of the teachers in KP are female and hence higher percentage of girls’ students in KP. On the contrary higher percentage of teachers in FATA are male and hence higher percentage of boys in FATA. However the trend shows that enrollment of girls is increasing in FATA and this year it has increased from 27% to 31% of the total enrollment.
- 10) Total enrollment in 1385 functional BECS in KP is 48,965 out of which 15,117 are boys and 33,848 are girls. Out of the total enrollment in BECS in KP, 31% are Boys and 69% are girls. 39,014 students were found present on the day of validation out of which 11,851 were boys and 27,163 were girls. The present percentage in boys was 78% and in girls was 80%. This trend indicates that a high proportion of girls are getting benefit out of the BECS. The number of girls across the classes is higher than boys, transpiring the fact that higher number of girls are out of school and facing the issue of access to schools and BECS has plugged that gap and secondly the teachers are predominantly females, with whom the girls and their families feel comfortable to continue education. However the gender parity index has dropped

in 5th class which could be attributed to girls' age, cultural issues and their opportunity cost at home.

- 11) Dropout rate is in normal range, commensurate with other govt. schools. The ratio of dropout is further high in boys in all class levels except class three. Average dropout in girls is 16% whereas average dropout in boys is 22%. This ratio of dropout or retention is in congruence with the dropout rate in KP's government primary schools. The lower dropout in girls advocates the passion and commitment in girls for getting education. However the situation requires policy reforms and legislation under Article 25A of the Constitution about free and compulsory school level education. All the provinces have promulgated the Right to Education Acts except KP. The Federal Government has also made legislation for right of free & compulsory education. The Acts will not only ensure admission of out of school children but will also ensure their retention in schools.
- 12) In KP the attendance situation on the day of TPV survey is satisfactory being above 79% at the average. The classwise attendance of girls is higher than boys across the classes from Kachi to fifth grade. This is indicative of the fact that BECS are close to community and close to girls and girls are more regular, punctual and serious in studies as compared to boys. This argument finds further strength from the increase in girls' attendance with the rise in class level from Kachi to fifth, which shows the commitment and degree of importance the girls' attach to the education as they get maturity. This is quite revealing fact of the TPV.
- 13) Major reasons of leaving school are poverty 20%, no books 23%, migration 17%, and lack of parents' interest 11%, admission in other govt. schools 7%. The other factors are beyond the control of BECS but timely provision of text books is essential for retention and control over the dropout due to books.
- 14) The ratio of very good and good results is improving, reducing the satisfactory slab and this ratio attains the maximum in fifth class, where students get maturity and start understanding things. The percentage of very good is highest in 5th level. The Good category is also stable and increasing and the satisfactory is being taken over by the very good and good categories.
- 15) The pass percentage in both boys and girls is quite high. Fail are 12%, which is less than normal. The result of students appeared in 5th grade exam is same in percentage terms for both boys and girls. The absolute number of failed students is higher in boys but both have a pass percentage of 88%. This is more encouraging in case of girls, who secured equal position in pass percentage with boys.
- 16) The trend of result in Girls is better than boys. The girls have outperformed boys in majority of the years under review between 2007-2015. The average pass percentage in girls is 89%, two percentage points above the boys. This is indicative of the dedication and interest of girls in education and learning.
- 17) The outcome of BECS is literacy and continuation of education which is visible in continuation of the education by the students taking admission in 6th class. A significant number of students get admission in 6th grade, which is indicative of the

fact that during the last three years the admission rate in class 6th is above 80 percent of students passed in 5th class who gets admission in 6th grade.

- 18) The situation of continuation of education in Girls is worth attention. The trend of admissions in 6th grade in girls is lower than then boys, which is indicative of the socio-economic factors hindering girl's education at higher level, particularly in rural areas. Secondly non-availability of schools within reach for a 6th grade girl to travel safely is a big issue. The poverty, parental preference and priorities and opportunity cost of girls further hinders the admission in 6th grade. BECS has plugged the access issue at primary level but there is no such arrangement at middle and high school levels and hence it becomes difficult for the female students to continue, owing to long distances to be travelled, which involves both security and cost of travelling and hence discontinuation of education beyond 5th grade. However boys are not confronting the factors affecting girls' education.
- 19) 33% of the students desired to seek higher education, which shows the urge and interest of the children by recognizing the importance of education. But they are unfortunate by not having the educational institutions within reach and their lack of financial resources to afford off-village education. BECS is doing a GREAT job by providing education opportunities to such unfortunate children at their doorsteps.
- 20) Training in IT (21%) is the second option, which shows the awareness in children about the advantages, importance and future of IT. The third preferred training that the children would like to acquire is handicrafts (16%) followed by embroidery (13%) and beautician 5%. All these three are the preferred subjects of girls.
- 21) The attitude of the NGOs' monitoring Supervisors as well as BECs monitoring officers is friendly and the negative replies in this regards are insignificant. 71% of the VECs were found functional, whereas the others are required to be activated and made functional and the community involved in the affairs of the BECS.
- 22) About 97% of the parents were found satisfied from the teaching. Corporal punishment, children work for teachers or do they pay fine were found insignificant.
- 23) Performance of 53% of the functional schools is satisfactory, 38% is very good and only 4% is weak.
- 24) The closed non-functional schools are due to teachers' absenteeism in KP and inaccessibility in FATA due to operation.
- 25) Salaries of the teachers are quite low and hence their interest. Delay in payment of salaries also affects the teaching process.
- 26) VECs can play key role in the success of BECS. The NGOs may activate and associate the VECs and perform co-curricular activities every month.
- 27) Very impressive success stories of the students, who got the opportunity to get education through BECS.
- 28) In FATA total enrollment in 837 BECS (130 schools are inaccessible in North and South Waziristan and 3 are non-functional) is 42,646 out of which 29,307 are boys and 13,339 are girls. Out of the total enrollment in BECS in FATA, 69% are Boys and 31% are girls. The enrollment has improved and the total enrollment may add about 6000-7000 students if the inaccessible schools are taken into account. 37,335

students were found present on the day of validation out of which 24,829 were boys and 12,506 were girls. The present percentage in boys was 85% and in girls was 94%.

- 29) Dropout rate is in normal range commensurate with other govt. schools in FATA. The ratio of dropout in girls is low between Kachi and class two but has increased in higher classes. Average dropout is 18% whereas average dropout in boys is 17% and in girls is 18%. This ratio of dropout or retention is in congruence with the dropout rate in FATA's government primary schools.
- 30) The attendance situation on the day of TPV survey in FATA was found satisfactory being above 90% at the average. The class wise attendance of girls is more than boys across the classes from Kachi to fifth grade. This is indicative of the fact that BECS are close to community and close to girls and girls are more regular, punctual and serious in studies as compared to boys. This argument finds further strength from the increase in girl's attendance with the rise in class level from Kachi to fifth, which shows the commitment and degree of importance the girls attach to education as they get maturity.
- 31) The outcome of BECS is literacy and continuation of education, which is visible in continuation of the education by the students taking admission in 6th class, as above 45 percentage of boys passed in 5th class get admission in 6th grade. The situation of continuation of education in Girls is worth attention. In FATA the trend of admissions in 6th grade in girls is lower than the boys, which is indicative of the socio-economic factors hindering girl's education at higher level particularly in rural areas. Secondly non-availability of schools within reach for a 6th grade girl to travel safely is another big issue. The poverty, parental preference and priorities and opportunity cost of girls hinders the admission in 6th grade. BECS has plugged the access issue at primary level but there is no such arrangement at middle and high school level and hence it becomes difficult for the female students to continue, owing to long distances to be travelled which involves both security and cost of travelling and hence results in discontinuation of education beyond 5th grade.

9. Recommendations

- 1) There is shortage of schools in both KP and FATA. The number of schools for girls are only 35% of the total primary schools and need huge investment to remove the gender disparity. This deficiency further hinders the girls' education after primary by not having middle and high schools within reach. The government may enhance funding and establish more BECS to plug the gap.
- 2) An overwhelming 65% of the school buildings are comprised of Teachers' home followed by community provided (17%). Almost 85% of the buildings are provided by the community (teachers or community) and hence main factor in the success of BECS project is the personal involvement of the teacher or the community and the govt. may scale up this strategy.
- 3) The data about availability of teaching material reveals that about 51% of the schools have signboards, 81% have blackboards available, books are available in 85% of the schools, mats available in 67% schools, study charts in 58%, and Teachers Diary in 26% of the schools. A mechanism may be chalked out for replenishment of supplies on an ongoing basis.
- 4) Majority of BECS teachers are trained. 39% of them are PTC trained, 10% are CT, 9% or B.Ed, 1% are M.Ed and 5% are others. Whereas 36% are not untrained formally. About 74% of the teachers have got training under BECS project, out of which 48% teachers have got 7 days training and 45% teachers have got 15 days training. "Fast Track" crash training programme may be arranged for 36% untrained teachers or BECS may specially design a training program. The professional training may build their capacity in terms of pedagogy and other essentials like classroom management, student's behavior, community mobilization, students' record management etc.
- 5) Training Need Assessment (TNA) indicates that 34% of the teachers need dedicated/specialized training in multi-grade teaching, 38% of the teachers require training in school administration, 26% in preparation of test papers, 40% in increase in enrolment or community mobilization and retention of students and 11% in other fields. Subject specific training need assessment indicates that 19% of the teachers need training in teaching science & maths, 33% in English and 5% in other subjects. These trainings may be arranged under a phased program.
- 6) The ratio of dropout is high in girls particularly after 5th grade, which is due to non-availability of middle/high schools within reach and the government may enact RTE under Article 25A of the Constitution about free and compulsory school level education and allocate adequate resources for meeting the deficiency.
- 7) Major reasons of leaving school are poverty 20%, no books 23%, migration 17%, and lack of parents' interest 11%, admission in other govt. schools 7%. The other

factors are beyond the control of BECS but timely provision of textbooks may be ensured through an ongoing arrangement with the help of the partner/monitoring NGOs.

- 8) Above 80 percentage of students passed in 5th class get admission in 6th grade. But the trend of admissions in 6th grade in girls is lower than the boys, which is indicative of socio-economic factors hindering girl's education at higher level particularly in rural areas. Secondly non-availability of schools within reach for a 6th grade to travel safely is another big issue. The poverty, parental preference and priorities and opportunity cost of girls hinders the admission in 6th grade. BECS has plugged the access issue at primary level but there is no such arrangement at middle and high school level and hence it becomes difficult for the female students to continue, owing to long distances to be travelled which involves both security and cost of travelling and hence schools ought to be constructed to enable the children particularly girls to continue their education.
- 9) An overwhelming majority of the students, i.e. 33% desired to seek higher education, which shows the urge and interest of the children to seek higher education. BECS is doing a GREAT job by providing education opportunities to these children but it is for the provincial government to make arrangements for higher education of the aspiring students.
- 10) 21% of the students opted to seek IT training, which shows the awareness in children about the advantages, importance and future of IT. The third preferred training that the children would like to acquire is handicrafts (16%) followed by Embroidery (13%) and beautician 5%. TEVTA and such like bodies may arrange training facilities for BECS students in the given fields.
- 11) 71% of the VECs were found functional, whereas the others are required to be activated and made functional and the community involved in the affairs of the BECS. The monitoring NGOs may spearhead and activate VECs.
- 12) The teachers' salary is below the minimum wage i.e. Rs. 12,000/pm. The salary may be enhanced and paid on time.
- 13) The NGO may activate and associate the VECs and perform monthly co-curricular activity in the school and associate the community.
- 14) The TPV may be a regular feature for effective regulation and productivity of the system.

10 List of functional schools in KP
